

WYOMING CATHOLIC COLLEGE

ACADEMIC CATALOG

Apostolic Blessing

Joyfully, I welcome the founding of Wyoming Catholic College, under the patronage of Mary, Seat of Wisdom. Here, our youth, the hope of our future, will receive a Catholic liberal arts education, ordered to the truth that will set them free. This will help prepare them to lead full and fruitful Christian lives, to serve as witnesses in bringing Christ's Good News to our secular society, and, finally, to achieve that Heavenly Beatitude promised to us by our Lord. Therefore, gladly, I impart my Apostolic Blessing to the administration, faculty, and students of Wyoming Catholic College, invoking upon them the grace and peace of our Lord Jesus Christ.

*Upon the Founding of the College,
The Solemnity of the Assumption, August 15, 2005
Most Reverend David L. Ricken, DD, JCL
Former Bishop of Cheyenne (Presently Bishop of Green Bay)*

WYOMING CATHOLIC COLLEGE

CATALOG

2016–2017

INTRODUCTION

Sometimes, on rare occasions, something genuinely new comes into the world. Wyoming Catholic College is one of those new things. It began in reaction to a failing culture and widespread educational malpractice. Back in 2005, the founders of Wyoming Catholic College put together a document called the Philosophical Vision Statement whose aim was to articulate what the college would stand for, and the first Board of Directors approved it two full years before professors and students first came together in the classroom. At WCC, this document continues to provide a source of strength and direction.

What does it say? It points out in detail how contemporary education has lost its central purpose, which is to discover the truth about the deepest questions, and even, worse, it has lost its trust that the truth is there to be discovered. The PVS shows what the Western tradition is. Part of the tradition lies in the “thousand good books” that the educator John Senior recommends for everyone, an education that starts in the home. Part lies in the engagement with nature on the farm or in the forest or in the mountain wilderness of Wyoming. A still higher part comes through the experience of liturgy, with its music and its high forms. And the crucial part in the classroom comes through a prolonged experience of the Great Books whose thought has given our civilization its answers to the question about how to live a fully human life—answers that are sometimes permanent, sometimes open to reconsideration and change, but always deeply revealing about the things that matter most.

This catalog lays out in detail the practical ways that the Philosophical Vision Statement is being realized in our tenth year since classes started in 2007, and it reflects the new thing that has arisen—unexpectedly, perhaps—from the original vision. This college has become a place of great coherence and energy. Using the “perennial philosophy” that has formed the best minds and leaders in Western Civilization, Wyoming Catholic College presents an academic program that fosters the best kinds of conversations across the disciplines and unites them with religious fervor and a sense of hope that only the peak experiences of life can give.

Our college’s unique approach is first to immerse students in nature. Beauty and challenge captivate them from their first day on campus, when they prepare for a three-week backcountry expedition, where they test themselves, learn their limits and discover new capacities; they deepen their faith and in learning more about others, learn also how to lead. Subsequent trips, organized both by the

College and by students themselves, nurture community and love for the Rocky Mountain West. Our required freshman course in horsemanship makes this dimension of “gymnastics” (in the ancient Greek sense) even more particular.

Without real experience of difficulty and danger—without an adequate sense of what reality is—the higher intellectual accomplishments have no ground to stand on. But with this experience, thought can climb higher and higher without losing the essential human connections and the growing joy of mastery that it ought to bring. Intellectual accomplishment at Wyoming Catholic College does not lead to arrogance but to a greater good shared by all. This goodness permeates every aspect of the college community, especially when it is rooted in the Holy Eucharist

The formation that students receive here will not only form them intellectually and spiritually, but will also enrich their lives by cultivating the capacity for wonder. Parents will find that there is no greater gift they could have given, and they can be confident that their sons and daughters will have a better foundation—for any career—than specialized training could ever provide. It is something greater than anyone expected. It is the old made wholly new.

ABOUT WYOMING CATHOLIC COLLEGE

OUR OBJECTIVE

Wyoming Catholic College offers a classical liberal arts education in three dimensions—mind, body, and spirit. We accomplish this by immersion: in the profound truth of our Western tradition in the Great Books; in the challenging beauty of mountains and wilderness in our Outdoor Leadership Program; in the divine goodness of our Catholic spiritual heritage in liturgy, sacraments, and community. This unique combination of educational spheres results in graduates who know and love truth, think clearly and communicate eloquently, and act with confidence and wisdom.

Wyoming Catholic College provides a comprehensive education that embraces many disciplines and skills: imaginative literature, history, philosophy, theology, spirituality, writing, reasoning, oratory, Latin, art history, music, mathematics, natural science, outdoor leadership, and horsemanship. A curriculum of such breadth and depth allows students to know their place in history, to see the true, the good, and the beautiful and to be free to pursue any career path they choose after graduation. Students graduate with the degree of Bachelor of Arts in Liberal Arts.

LIBERAL ARTS EDUCATION

Young people in most institutions of higher education today are faced from the outset with a daunting array of specialized classes. It is wise, however, for them first to obtain a more general, foundational education that will serve them for the remainder of their lives regardless of the specialization they might later undertake.

Wyoming Catholic College's liberal arts program comes from a distinguished tradition reflected in a carefully designed, integrated curriculum that is required of all students. This curriculum challenges students and stretches them to discover their human potential in becoming fully educated. In "The Great Conversation," Robert Hutchins stated:

The liberal arts are not merely indispensable; they are unavoidable. Nobody can decide for himself whether he is going to be a human being. The only question open to him is whether he

will be an ignorant, undeveloped one, or one who has sought to reach the highest point he is capable of attaining. The question, in short, is whether he will be a poor liberal artist or a good one.

Liberal education addresses the whole of life and prepares one to live an intelligent and meaningful life in the midst of family, church, and society. As Blessed John Henry Newman observed in *The Idea of a University*, “A cultivated intellect, because it is a good in itself, brings with it a power and a grace to every work and occupation which it undertakes.”

The College offers to its students an intellectual formation that is complemented by the spiritual and physical formation offered to the students outside the classroom, while intellectual formation takes place primarily and formally in the classroom (and will be treated in more detail in the section on the curriculum), it is accomplished also in conversations around the lunch table between faculty and students, in late night gatherings in the dormitories, and in the context of organized activities involving the larger College community.

The Guest Lecture Series introduces distinguished men and women who contribute complementary perspectives from a wide range of disciplines. Four such lectures are held each year. Recent lecturers have included George Weigel on St. John Paul II, Dr. Arthur Hippler on the Moral Law and the New Evangelization, Dr. Richard Ferrier on Lincoln’s political rhetoric, Fr. Kevin FitzGerald on bioethics and genomic medicine, Dr. Lorenzo Candelaria on Mozart’s Requiem, and Dr. Joseph Pearce on the quest for William Shakespeare.

The College enriches the campus conversation through the bi-annual All-School Seminar, where a reading of common interest is discussed by students combined from all four classes in sections with faculty and staff members.

Less formally, the intellectual life is pursued through various cultural activities held both on and off campus. On-campus activities include formal dinners and dances, outings to the opera and ballet, and several film series.

CATHOLIC TRADITION

The College is planted in the deep center of Catholic tradition. The truth sets us free, our Lord says—not only truth discovered by human reason, but also revealed Truth, which perfects our knowledge of who we are and who our God is.

Theology instructors at Wyoming Catholic College have the proper mandate to teach theology, and always do so in accord with the Magisterium of the Church. In fact, all Catholic teachers make a public Profession of Faith and take the Oath of Fidelity at the start of each academic year, while all non-Catholic faculty promise never to publicly reject or defy the teachings of the Catholic Church or the Pope’s authority as head of the Church. The President and chaplains join

the faculty for the profession and oath.

The chaplains of the College offer daily Mass and make themselves readily available for Confession and spiritual direction, and provide regular hours for Eucharistic adoration. Devotion to the Blessed Virgin Mary and an understanding of Marian spirituality are encouraged throughout the school year. There is a nightly opportunity for the communal recitation of the Rosary, and there are also special celebrations on Marian feast days. The College offers an Easter Retreat during the Holy Triduum. Retreats also may be offered during fall or spring breaks in the academic year.

The College celebrates in a special way four great Solemnities: All Saints (November 1); the Immaculate Conception (December 8); Our Lady, Seat of Wisdom, Patroness of the College (February 4); and the Annunciation (March 25). On each of these special days, classes are suspended and the schedule is similar to that of Sunday, with a more solemn Mass, a formal dinner, and homegrown traditions such as the Quis Quid challenge game pitting student teams of Poets, Philosophers, and Cowboys against one another.

Furthermore, throughout the year, instruction is offered in fundamental spirituality by means of the Theology Practica, which delve into practical topics such as how to pray with Scripture (*lectio divina*), how to participate more deeply in the sacred liturgy, how to discern one's vocation in life, and how to practice the virtues necessary for discipleship to Christ.

While typically the student body of any small Catholic college is predominantly Catholic, non-Catholic students are welcomed at Wyoming Catholic College, and they too, we believe, will greatly benefit from the Catholic dimensions of our College.

IMMERSION IN THE OUTDOORS

Wyoming Catholic College has conceived a third sphere of education, immersion in the reality of nature, as a corrective to the modern world's over-emphasis on technology and virtual reality. This experience deepens every student's knowledge of the world as created and sustained by God. Students live in surroundings that provide encounters with the true, the good, and the beautiful in God's "first book," the natural world. These primordial settings invigorate their imaginations, summon creative thinking, and open their minds and hearts to the rest of what the College has to offer.

The founders chose Lander, Wyoming, as the site of the College in large part for its suitable environs. Lander is situated on the banks of the Popo Agie River, which flows out of the Wind River Range near the Shoshone National Forest, which also encompasses the Absaroka and Beartooth Ranges. These ranges are

full of cathedral-shaped peaks carved out of soaring granite. Dotted with numerous glacial lakes, the mountain forests are filled with a great diversity of plant and animal life. The perfect location for outdoor adventures, Lander's surroundings immerse students in the reality and beauty of nature. Such experiences will inspire and nourish their souls. They can then return to the classroom refreshed and filled with the "grandeur of God."

Moreover, by being in the outdoors, students are taken beyond their normal spheres of confidence into an environment where they must make real decisions that have real consequences for life and well-being. Through various challenges over the course of four years, they learn many virtues that they bring back into everyday life to help them become more successful at their studies and, in general, better men and women.

Immersion in the reality of nature is integrated into the curriculum in the Field Science courses and in the Experiential Leadership Program, which includes Horsemanship, student-led Outdoor Weeks, and other activities throughout the year.

The College's unique Freshman Leadership Program consists of two parts: a summer course and a winter course. Wyoming Catholic College spends an entire month during the freshman year teaching students how to participate safely and responsibly in the beauty of the wilderness around them.

The summer course is a 21-day wilderness expedition ending just before academic classes begin. After two and a half days of training in wilderness first aid, students go out in groups of ten to twelve classmates, accompanied by a chaplain and two WCC alumni or upperclass students who have extensive training and experience in leading outdoor trips. Students gain the satisfaction of making 13,000-foot peak ascents, trekking about 100 miles, fly-fishing some of the most beautiful lakes in the Rocky Mountains, cooking their own meals, and participating in Holy Mass on mountain tops. Guided by instructors' expertise, students learn and put into practice the essential qualities of effective leadership and followership, such as prudent judgment, co-responsibility, communication, self-control, and courage in dealing with daily challenges.

Freshmen return from Christmas vacation a week early to start the spring semester with the second part of the program: seven days of training in winter survival skills. Students return to the wilderness, where they learn to ski and build igloos, quinzhees, or snow caves: in short, how to live and travel comfortably, even in challenging weather conditions.

To encourage student participation in a wide range of outdoor activities such as hiking, skiing, fishing, and horseback riding, the College makes available the proper equipment, along with computer technology for plotting routes and

printing waterproof maps. To promote the use of these resources, the College trains student leaders to lead trips during designated Outdoor Weeks.

OUR CAMPUS

Since its opening in 2007, Wyoming Catholic College has called the town of Lander its home. The Catholic parish of Holy Rosary Church and its various buildings, located on twenty-four acres with a splendid view of the Wind River Range, serve as one main part of the campus. Additional buildings in downtown Lander comprise the remainder. The church of Holy Rosary is the religious center for liturgies and devotions, with an additional small chapel located in the Downtown Center. Students attend classes both in the education building of Holy Rosary and in the Downtown Center. Most meals are taken at Frassati Hall, which houses the cafeteria and student lounge. The Downtown Center also includes CRUX Coffee, Tea & Sustenance, where students can enjoy a beverage or meal. College offices occupy the second floor of the Downtown Center, offering students easy access to faculty and staff. The College library and student computer stations are located on the first floor of the Downtown Center. Residence halls are situated both on the parish grounds and elsewhere within easy walking distance, with men and women living in separate buildings.

The College also owns a 600-acre ranch adjacent to 1,800 acres of public lands, fifteen miles south of the town of Lander. This ranch is used for Horsemanship, Outdoor Weeks, and student activities.

COMMUNITY LIFE

Campus life at Wyoming Catholic College aims at developing true community, which can only be accomplished if the size of the College remains small. For this reason, the College aims at an eventual student body of no more than 400. But small size alone does not guarantee true community. As the word suggests, all aspects of campus life must also be ordered by an appropriate principle of unity in order to constitute an integrated and vibrant Christian community. At Wyoming Catholic College this principle of unity is its mission statement. In essence: “The curriculum and campus are devoted to the formation of the whole person, i.e., the spiritual, physical, and intellectual dimensions.” On campus, community life embraces these three dimensions inasmuch as teachers, administrators, and students live their faith together, experience the outdoors together, and learn together.

In order to cultivate these three dimensions properly and thus develop a true Christian community, certain prudential rules govern the social life of the campus. A full account of these rules, which concern proper dress, alcohol and drugs, use of technology, and other such matters, is presented in the Student Handbook, distributed to all students at the beginning of each academic year.

ACCREDITATION

Wyoming Catholic College is a candidate for accreditation with the Higher Learning Commission (www.hlcommission.org). This candidacy status was granted on October 30, 2014. The term of candidacy may last up to four years and involve biennial evaluations to determine that the College is making reasonable progress toward meeting accreditation requirements.

On March 14-15, 2016, the Higher Learning Commission's site team visited Wyoming Catholic College and later issued its Report of a Biennial Evaluation Visit (HLC Report). In this HLC Report, the team recommends that WCC continue on the schedule of candidacy in preparation of a comprehensive review in the spring of 2018.

Candidacy status has many of the benefits of accreditation including acceptance of our credits at other colleges, universities and graduate programs. In addition, the College is recognized by scholarship programs, federal student loan servicers, insurance and other employer programs that require an "accredited" status.

EDUCATION AT WYOMING CATHOLIC COLLEGE

OUR OBJECTIVE

Tradition teaches that education is the art of making persons better by learning. And we learn in only two ways: by instruction and by discovery—that is, with or without the help of a teacher. Learning with the help of a teacher constitutes formal education.

True education can happen anywhere: in the groves of Plato’s Academy or the halls of Aristotle’s Lyceum, along the shore of Galilee, or on the ranchlands surrounding Wyoming Catholic College. However, while any situation involving human beings seeking truth may be an education, a college is essentially a “collection”—a well-ordered gathering of teachers, students, and subjects, ordered to an educational purpose. Consequently, education at Wyoming Catholic College is defined by its mission, its teachers, its students, and its curriculum.

OUR MISSION

Wyoming Catholic College is a four-year college committed to offering a liberal arts education that steepes its students in the beauty of the natural world and imbues them with the best that has been thought and said in Western civilization, including the moral and intellectual heritage of the Catholic Church. The College strives to promote a love of learning and an understanding of both natural order and supernatural grace in the quest for virtue.

The curriculum and campus are devoted to the formation of the whole person: spiritual, physical, and intellectual. Studies include the classics of imaginative literature, history, mathematics, science, philosophy, fine arts, language arts, and theology. They employ Great Books as well as the experience of the natural world, effecting a rich combination of philosophical and poetic knowledge. Students’ imaginations are enriched and their capacity for wonder deepened. Moreover, students and faculty share in a campus life that reflects and embodies the ideals taught directly and indirectly in the classroom.

The liberal-arts tradition does not emphasize the dissemination of information but rather the development and perfection of the intellect, the will, and emotions, enabling students to desire and embrace the good, the true, and the beautiful throughout their lives. The College is staunchly faithful to the Magisterium of the Roman Catholic Church and the deposit of faith handed down over the past

two thousand years.

By persevering through the entire sweep of the four-year curriculum, students will:

- Grow in personal virtue, including the virtues of courage and self-restraint; dealing equitably with others; learning the principles of leadership and how to make effective decisions; learning to articulate the nature of the common good and how to act in light of it; learning to articulate the virtues of the Catholic life and, if Catholic, living them.
- Strengthen their exterior and interior senses, including learning to see and hear with more attention to detail and greater appreciation of the object perceived, as well as stocking their imaginations with beautiful images and strengthening their own ability to imagine.
- Acquire a generalist's grasp of the Arts and Sciences, including the first principles and chief conclusions or debates of each major area of study at the College, the habit of explaining natural and cultural phenomena in terms of their root causes, and seeing the connections between academic courses and how all knowledge forms a unity.
- Become independent and lifelong learners, through learning how to interpret texts; learning how to find, analyze, and synthesize information; learning to speak and write well and to discuss effectively; and through acquiring the ability to engage respectfully those whose points of view are different from their own in a dialectical process of persuading and being persuaded.
- Acculturate as members of a larger community, acculturating as citizens of Western civilization and mentally joining the "conversation" of the past centuries, as well as becoming familiar with the traditions and institutions of the Catholic Church as formative for Western civilization and, if Catholic, acculturating as Catholics.

OUR TEACHERS

First and foremost, our faculty are committed to their vocations as teachers. Hence, even though many of the College's faculty are accomplished writers and researchers, their first priority is always teaching. All professors share an overriding commitment to the students and to their ongoing formation. This is the reason why our ratio of student to full-time teacher is 9:1, with class size ordinarily no more than twenty students. In senior year, each student works one-on-one with a professor as his or her thesis and oration adviser.

Our teachers know what a teacher is—and is not. They know they are only the instrumental cause in helping their students to come to know the truth, while students are the primary cause. They know that, as Socrates claims in the

Theaetetus, a teacher is like a midwife: he does not himself give birth to the student's new understanding, but only helps deliver it. Each student must see the truth for himself; the teacher cannot see it for him. If the student were merely passive and only the teacher active, then to teach would mean to give information in exchange for money, while in fact to teach means to cooperate in the students' own growth as human beings—a gift beyond any price.

Inspired by this ideal, our teachers know how to fit their pedagogy to the students. They know how to adapt their approach to the circumstances, that is, to the type of material being taught, and to the nature of the class. They realize that sometimes they must teach through lecturing, sometimes like a Socratic midwife through conversation driven by questioning, and sometimes through exercises aimed at developing particular habits.

Because Wyoming Catholic College prides itself on providing an integrated generalist's education to its students, it is often pedagogically advantageous when faculty teach across the curriculum and thus bring their own discipline's perspective into conversation with the rest of the program. For example, it is clear that theology can inform the study of sacred art, that to understand the nature of mathematics we must philosophize, and that the study of ethics would be greatly impoverished without the imaginative experience that only great literature can provide. Accordingly, students at Wyoming Catholic College can expect to study with teachers drawn from across the disciplines who may either be experts in one field or whose cross-disciplinary perspective significantly facilitates the College's goal of integration.

While our teachers aim at excellence, they understand that their job is to help students become educable, not completely educated. To become educated takes a lifetime. Faculty are confident that if they help students gain a foundational grasp of each subject, if they cultivate in students the skills of learning (reasoning, reading and writing, speaking and listening), if they foster the motivation to learn, their students will make themselves lifelong learners and, one day, educated persons. The habit of learning is the true fruit of liberal education.

This lifelong journey begins with a student's entrance into the great tradition of Western culture. Our teachers realize they are not the only teachers at the College: they are themselves students of greater teachers who have come before. Our teachers sit at the feet of great authors, looking to *them* for wisdom. Eager to pass on what they have received, our teachers introduce students not just to the great ideas of Western civilization but to the very authors of the great ideas: students become disciples, not just of the faculty at Wyoming Catholic College, but of Homer, Plato, Aristotle, Virgil, St. Augustine, St. Thomas Aquinas, Dante, Shakespeare, Dostoevsky, and many more. Through their books, these masters of bygone time join a living conversation with young people today. Knowing the great authors, our students will have teachers long after they have graduated.

Above even the great authors of the Western tradition stands the Magisterium of the Catholic Church. Our Catholic teachers submit to the Church's authority by taking a formal oath of fidelity, and with confidence in the unity of truth and the harmony of faith and reason, they pledge to preserve communion with the Catholic Church and to avoid any teachings contrary to the faith. They know that the revealed doctrines interpreted, taught, and guarded by the Magisterium of the Catholic Church come from the infallible God, who can "neither deceive nor be deceived."

OUR STUDENTS

What specific virtues should a student possess in order to succeed at Wyoming Catholic College? We are convinced that if a student possesses the virtues of zeal and docility upon entering the College, the other virtues necessary to success will soon be formed—diligence in study, punctuality in completing assignments, and joy in learning.

The very word "student" comes from the Latin *studiosus*, meaning zealous. A student is zealous for the truth. Zeal, we might say, is what separates and distinguishes the true student from enrollees just biding their time in school. The student, recognizing his ignorance in respect to the truth, whether it concern theology, philosophy, mathematics, or any other subject, is eager to set out on a journey of discovery.

The Parable of the Sower teaches that soil must be rich if a seed is to take root and bear abundant fruit. Likewise, a student must be docile if the word is to take root and produce its fruit, which is understanding. As Christ says in Matthew 13: "The seed sown on rich soil is the one who hears the word and understands it, who indeed bears fruit and yields a hundred or sixty or thirtyfold."

Docility is a moral virtue—the mean between the two vices of subservience and intractability. The docile student has a proper respect for the teacher. If he has too slavish a respect, he runs the risk of simply accepting what is taught through rote memory without making the effort to understand it. He is then indoctrinated, but not taught. On the other hand, if the student has too little respect for the authority of the teacher, he will refuse to listen and therefore remain ignorant or in error.

Our curriculum challenges each student to grow and mature. We are confident that students who seek to form themselves in zeal and docility will gain an authentic liberal education at Wyoming Catholic College.

OUR PROGRAM

1. Integrated Curriculum. With tradition as guide, Wyoming Catholic College has taken due care in choosing the right subjects and putting them in the right order to establish an integrated curriculum required of all students. This approach has two great benefits. First, students experience an ordered education

and note how subjects are related to each other. Second, since all students study the same subjects and do the same readings, they can converse on academic topics with all of their fellow students. The curriculum thus creates a true community of learners who know that ideas and the life of the mind truly matter. This integration is further reinforced by our commitment to interdisciplinary teaching throughout the program.

2. Great Books. Whereas a specialist tends to reap facts, a generalist, with his liberal education, reaps wisdom. And because the Great Books contain wisdom of timeless relevance to every human being, they stand at the heart of our curriculum. These books have been called the great conversation, a storehouse of wisdom, and the greatest possible collection of teachers. This array of authors comprises an intellectual and cultural inheritance of inestimable value, the rightful legacy of any liberally educated man or woman. Liberal education thrives upon and deepens the love of great literature, momentous ideas, profound beauty, revelatory truth, and moral dignity. Nor is the vast domain of art neglected. The Fine Arts curriculum, which introduces students to masterpieces of painting, sculpture, architecture, and music, also gives them the tools they need to interpret and appreciate these fruits of genius.

If this were merely the *secular* canon of Great Books, however, it would be deficient, because it would enshrine the principle “to the (cultural) victors go the spoils.” Truth, not worldly influence as such, is the ultimate criterion of greatness. Authors little recognized by the world, such as St. Athanasius, St. Francis de Sales, or Bl. John Henry Newman, are not only great by objective criteria, but also far greater than many more famous names that populate the conventional Great Books list. The curriculum at Wyoming Catholic College recognizes religious genius no less than it does secular genius, and so nourishes students with “the best that has been thought and said” by those who have best prayed and best loved.

3. Immersion in the Outdoors. Central to our curriculum is the principle of “immersion in the reality of nature.” Given the temptation of modern people to be enmeshed in the artificial world of technology, and given the increasingly narrowed use of the sense powers, especially the imagination, it is imperative that students regularly experience the world of nature, which helps restore and develop the exercise of these sense powers. Students are thus immersed in the outdoors through the Field Science courses, Freshman Leadership Program, the Horsemanship Program, the Outdoor Weeks, and many informal outdoor adventures.

4. Two Kinds of Class. Classes at the College are taught in a manner appropriate to the subject matter. Humanities, theology, philosophy, science, art history, music, and some of the mathematics courses are taught in sections with about twenty students, so that class discussion is not hindered. Teachers use a variety of teaching methods, from lecturing to a more Socratic approach involving the

students and teachers in a common conversation. Freshman Latin, the Trivium, some of the mathematics courses, and horsemanship are taught as skills classes, limited to about fifteen students per section. In the skills classes, normally the teacher does not lecture but guides students in developing skills and habits in reasoning, writing, and speaking. The teaching here is more in the manner of coaching. In every class at the College, students are always actively participating, whether by their attentive listening, their questions and answers, or their conversation.

HUMANITIES CURRICULUM

The Humanities curriculum consists of eight courses tracing the development of the Western tradition from the ancient Greeks to the modern day and consisting of texts in each course either chronologically or thematically arranged. The aim of the selections is to awaken the students to their intellectual and cultural inheritance. To engage these deeply consequential texts, encountering in them events, characters, and ideas of universal import, shapes intellect, imagination, and heart. Humanities courses concentrate on reading primary works from the disciplines of literature, history, philosophy, and theology.

Aristotle writes in the *Poetics* that poetry is the mode of knowledge, along with philosophy, that most evokes wonder. The study of literature enlivens students' attention to the things of this world, engaging and forming the senses, imagination, and emotions through the imitation of reality. Without this engagement of the whole person through the power of mimetic action, universal truths can become too abstract. The worlds of poetic making are embedded in "rich and contingent materiality," as John Crowe Ransom puts it, and in dealing with the historical and geographical circumstances of a people, epic poetry in particular—a major emphasis in the Humanities sequence—forms a people's way of looking at the world. What would Greece be without Homer, Rome without Virgil, Italy without Dante, or the English-speaking world without Shakespeare and Milton? Such great poets help shape man's relation to the cosmic order—the divine and the demonic, the natural world and the world of art, the presence of the historical past and intimations of the possible future. Great works of literature help form the human understanding of love, of friendship, of marriage and family, and of the modes of political order.

In their Humanities classes students master about thirty lyric poems over the four years. Committed to their storehouse of memory, poems such as Gerard Manley Hopkins' "God's Grandeur" and John Donne's "Death Be Not Proud," as well as passages from Shakespeare and Chaucer, cultivate both the language and sensibility of the undergraduates. They will live with these poems for life, and their meaning will grow in nuance as their personal experience unfolds.

Each major city of the West, such as Athens, Sparta, or Rome, embodies a certain self-understanding that manifests itself in history, the second major dimension of the Humanities sequence. The West, as the French thinker Remi Brague suggests, grows from the ways that each city influences the others—

especially when the Christian reality born in Jerusalem introduces a radical new possibility, which Augustine calls the City of God. As our own history shows, America absorbs and alters the tradition of these cities while influencing the shape of others. From the ancients to the moderns, from Homer to Nietzsche and Solzhenitsyn, there is a movement toward or away from the truths acquired through suffering the class conflicts, tyrannical ambitions, betrayals, wars, and natural calamities that always and everywhere characterize the record of man—as well as seeing the courage and wisdom of those whose virtues enable them to surmount these difficulties. History, like poetry, emerges through the curriculum as a mode of knowing and judging the contingent world of action.

Philosophy, the third discipline in the Humanities sequence, opens the students to dialectical inquiry. The West questions itself: students are engaged in the same self-scrutiny that shaped their intellectual ancestors and gave rise to great institutions such as the academy. In the many Platonic dialogues that students read, the dramatic form, which imitates actual conversations, is not reducible to a simple teaching—a powerful lesson in itself. This historical and dialectical approach, together with the systematic study of the *philosophia perennis*, helps students understand and respond to the world they live in.

The works of theology included in the Humanities sequence—not in the formal Theology sequence—are those most tied to the personal anxieties and joys of faith, such as St. Augustine’s Confessions or Pascal’s Pensees; to historical interpretation from a Christian perspective, such as Augustine’s City of God; or to guidelines for the practical Christian life, such as the Rule of St. Benedict.

Because the Humanities curriculum presents literature, history, philosophy, and theology in their historical and dialectical development, it serves to integrate the rest of the curriculum. It situates authors and texts with respect to one another, both in a particular era and across history, both in their differences and their similarities. In the end, it opens what Melville calls “the gates of the Wonder World” and allows students to see the majesty and integrity of the Western tradition.

By persevering in the Humanities curriculum, students will:

1. Become deeper and more reflective citizens of Western Civilization by standing consciously in a tradition of shared texts, events, people, characters, and ideas.
2. Learn about the people and events that shaped Western Civilization.
3. Engage in mature discussion and debate about the questions, problems, and ideas of each specific age, and how these ideas shaped today’s world.
4. Learn how to interpret texts with maturity and nuance by reading the Great Books, aware of generic and historical context within the Western tradition.
5. Engage and form their senses, imagination, and emotions.
6. Learn to see the universal in the particular.
7. Grow in wonder, the beginning of wisdom.

8. Integrate what they have learned in other areas of the curriculum by situating authors and texts with respect to one another in time and, by showing how ideas developed in connection to or combat with one another, bring out the conceptual relations between seemingly distant topics.

COURSES

HMN 101 Ancient Greece I (3 credits)

In the works of the ancient Greeks, the Western mind achieves its first comprehensive self-understanding centered in the paradigmatic choices of the hero. This course begins with the mythological splendor of Hesiod and Homer. Hesiod's *Theogony* unfolds the highly contentious order of the Greek gods, and Homer depicts the pathos and grandeur of mortal men in the Trojan War, which has a crucial importance for the gods themselves. Achilles in the *Iliad* and Odysseus in the *Odyssey* reveal two different versions of human excellence, one characterized by fearless openness and honor, the other by effective intelligence and the uses of deception. In one way, Achilles foreshadows all those who shine with absoluteness and clarity against their enemies, but in another, he anticipates the tragic heroes of Aeschylus and Sophocles, who become victims of their own greatness. Understood cynically, Odysseus might anticipate the cunning of Machiavelli, but he also positively foreshadows Socrates and the philosophic alternative depicted in Plato's dialogues. The Greek heroes reveal the perennial tensions between fate and freedom, family and city, heroic duty and common happiness, death and the desire for immortality, that shape the classical tradition and that echo powerfully even in the modern soul.

Hesiod	<i>Theogony</i>
Homer	<i>Hymns, Iliad, Odyssey</i>
Aeschylus	<i>Agamemnon, The Libation Bearers, The Eumenides</i>
Plato	<i>Symposium, Phaedrus</i>

HMN 102 Ancient Greece II (3 credits)

Classic accounts of two great wars dominate the second course on the Greeks. In Herodotus's fascinating, semi-mythological account of the rise of the Persian Empire under Cyrus, Darius, and Xerxes, students see how the Greek opponents of Persia, especially Sparta and Athens, successfully defend their country's liberty (490–480 B.C.) against a tyranny with overwhelming odds in its favor. Thucydides shows the aftermath of Greek victory, when the Athenians and Spartans turn against each other as rivals for the mastery of Greece. His account of the Peloponnesian War (431–404 B.C.) is not simply about a conflict between one city's interest and another's but an anatomy of perennial tensions between the oligarchs and the democrats, the few rich and the many poor. Set during the same war, the Dionysian comedies of Aristophanes present absurd but insightful proposals for peace between Athens and Sparta. Euripides's

Bacchae explore Dionysus as the symbolic figure of renewal and harmony as well as cruel destruction, while Sophocles' *Theban Plays* depict the suffering and ultimate redemption of the incestuous parricide, Oedipus, in contrast with the tragic, untimely death of his young mother/sister who defied the *polis* in the name of a higher unwritten law. In the *Apology*, Socrates answers the comic but damaging attack on philosophy mounted by Aristophanes in (*The*) *Clouds*. At the end of the semester, students turn to the question implicit in the context of endless war: what justice is and whether it is possible to achieve it. Plutarch presents the lives of two Greek lawgivers, Lycurgus and Solon, both of whom attempt to secure justice, peace, and stability, but by radically different statecraft. Both Plato's *Apology* and *Crito* portray the perennial tension between truth and power, philosophy and politics, in the person of Socrates and the institution of the Athenian state. The year culminates in a careful reading of Plato's *Republic*, with its considerations of the soul of the tyrant, the nature of the best city, the education necessary for it, and the hope offered by philosophy.

Aristophanes	<i>Clouds, Lysistrata</i> (optional)
Euripides	<i>Bacchae</i>
Herodotus	<i>Histories</i>
Plato	<i>Apology, Crito, Republic</i>
Plutarch	<i>Lycurgus, Solon</i>
Sophocles	<i>Oedipus the King, Antigone, Oedipus at Colonus</i> (optional)
Thucydides	<i>Peloponnesian War</i>

HMN 201 The Roman Order (3 credits)

Ancient Rome arose out of constant war. Early republican Rome defined itself by overthrowing its kings and establishing its military supremacy in Italy. Later, it came into its greatness as a Mediterranean power by conquering its great enemy, Carthage, in the three Punic wars. Its particular contributions to the West—discipline, *pietas*, reverence for the rule of law—reflect this martial spirit. Although Rome emerged as a great civilization through conquest, which St. Augustine in the *City of God* calls the “lust for domination,” it also received and made its own the cultural treasure of the defeated Greeks. Livy, Virgil, Lucretius, Marcus Aurelius, Cicero, Ovid, and Plutarch all imagine Roman civilization explicitly in terms of the Greeks. Rome makes Greece its own in a way that becomes a model for Europe and America. The West would be unthinkable without Rome. Regimes as diverse as those of Charlemagne, the Russian Tsars, and the American Founding Fathers have all imagined themselves as its successors. More than that, the Roman Catholic Church still finds its center in the city whose history gave the Incarnation and the rise of Christianity its civilizational frame. This Christian appropriation of Rome becomes the foundation of the medieval West.

Livy	<i>History of Rome</i>
Plutarch	<i>Lives of Noble Grecians and Romans</i>

Virgil	<i>Aeneid</i>
Ovid	<i>Metamorphoses</i>
Lucretius	<i>On the Nature of Things</i>
Marcus Aurelius	<i>Meditations</i>
Cicero	<i>On Friendship, On Duties, "Dream of Scipio"</i>
St. Benedict	<i>The Rule</i>

HMN 202 The Medieval Vision (3 credits)

Early in his *Confessions*, St. Augustine expresses his dismay that, as a young man, he wept for Dido in the *Aeneid* but not for the state of his own soul. With this major work of spiritual autobiography, a new Christian vision emerges full-blown and with it a major new form that recognizes the necessity for a conversion or baptism of the order that has come before. The journey of Aeneas to found Rome becomes the journey of the soul to its new founding in God—the drama of conversion also glimpsed in the Christianization of northern barbarians by Rome. After considering the encounter with Lady Philosophy in Boethius, the course turns to the courtly tradition and the call of Beatrice in Dante’s *Commedia*, the fullest flowering of the medieval synthesis between the pagan past and the Christian present. In this great resurgence and reworking of the ancient epic, Dante is guided by the classical past in Virgil, and thus serves as the herald of the Renaissance. At the same time, the *Commedia* is the greatest literary expression of the medieval Scholastic mind, the poetic equivalent to Chartres cathedral or Aquinas’s *Summa*.

St. Augustine	<i>Confessions</i>
Boethius	<i>The Consolation of Philosophy</i>
Dante	<i>Commedia: Inferno, Purgatorio, Paradiso</i>

HMN 301 Medieval and Early Modern Renaissances (3 credits)

Writing later in the same century as Dante, already influenced by Boccaccio and Petrarch, Chaucer stands at a pivotal point in literary history. On the one hand, he is already the shining evidence of a renaissance, a new flowering of Christian humanism. An intense interest in pagan antiquity and the poetic and Platonic traditions informs the great human comedy of his *Canterbury Tales*. But he also reflects, like the anonymous drama *Everyman*, the religious, philosophical, and social problems that plagued the close of the Middle Ages. Like Dante, Chaucer exposes and strongly criticizes abuses in the church and anticipates the religious controversies that arise over a century later. In this course, the focus turns to the period commonly known simply as the Renaissance, the last great flourishing of its kind in the Western tradition, standing Janus-like between the medieval and modern worlds, the age of faith and the age of secular reason. There is a new global sense, both a literal “new world” and a changed consciousness. Marlowe’s *Dr. Faustus* captures the transitional state of the period. The writings of Luther and Erasmus reveal the great religious controversies that shape the age, and Machiavelli overturns classical political assumptions. With the plays of Shakespeare, the course

culminates in the greatest works of the period, reflecting the nature of man in its heights and depths. Hamlet praises human nature almost without reserve: “how noble in reason! how infinite in faculty! in form and moving how express and admirable! in action how like an angel! in apprehension how like a god!” Yet he also asks, “And yet, to me, what is this quintessence of dust?”

Anonymous	<i>Everyman</i>
Marlowe	<i>Dr. Faustus</i>
Chaucer	<i>Canterbury Tales</i>
Erasmus	<i>In Praise of Folly, On the Freedom of the Will</i>
Luther	<i>On the Freedom of the Christian, On the Bondage of the Will</i>
Machiavelli	<i>The Prince</i>
Shakespeare	<i>Hamlet, Twelfth Night, Henry V, The Merchant of Venice, King Lear, The Tempest</i>

HMN 302 The Early Modern World: 1600-1900 (3 credits)

The course spans three centuries during which occur great changes in Western thought and culture, from the cresting of the High Renaissance, through the Enlightenment and Romantic periods to the beginnings of Modernism, so-called. The class begins with the Christian Humanism of Cervantes whose traditional worldview stresses the Providence of God and the dignity of man – a dignity rooted in the Incarnation, that mystery of “immensity cloistered” in Mary’s womb, to use Donne’s phrase. Apart from the powerful expressions of Christian devotion found in the Metaphysical Poets, the 17th century also witnesses a growing sense of man’s distance from God and from each other. Milton’s great epic attempts to “justify the ways of God to man,” but the growth of Rationalism gives rise to doubts about the truths of Revelation. Pascal seeks to answer such doubts in his *Pensées*, but the gray tide of skepticism rises, along with an increased emphasis on empirical evidence as the only path to truth. The waning confidence of a once-unified Christendom continues to weaken as humanity turns its attention to the here and now. Pope writes prophetically that the “proper study of mankind is man,” yet humanity divorced from the divine remains unfulfilled; neither rational thought nor empirical proof can speak to the deepest longings of the human heart. Thus the Romantics propose an alternative: to see God in Nature itself – Blake’s “World in a Grain of Sand” and “Heaven in a Wild Flower.” But this welcome response to the Enlightenment and intended return to the transcendent is now stripped of those “outworn” creeds commonly held responsible for Europe’s religious strife. The Romantic manifesto, which finds political expression in the ideals of the French Revolution – *liberté, égalité, fraternité* – ends in 19th century despair, obscured and periodically alleviated by the false promise of human and material progress. Dickens’ *Bleak* and Tolstoy’s *Ivan Ilych* rest in a naïve conviction concerning the possibility of personal “success,” but observers like Arnold contend that humanity remains confused, isolated and abandoned on life’s “darkling plain.” Only the minority

opinion now holds, as in the poet Hopkins, that there “lives the dearest freshness deep down things.”

Cervantes	<i>Don Quixote</i>
Metaphysical Poets	
Milton	<i>Paradise Lost</i>
Pascal	<i>Pensées</i>
Voltaire	<i>Candide</i>
Pope	<i>Essay on Man</i>
Augustan Poets	
Burke	<i>Reflections on the Revolution in France</i>
Romantic Poets	
Dickens	<i>Hard Times</i>
Tolstoy	<i>The Death of Ivan Ilych</i>
Victorian Poets	

HMN 401 The American Tradition (3 credits)

To understand the American tradition is to appreciate the social, cultural, and political traditions of four key civilizations: in the ancient period, the Hebrew, Greek, and Roman, and in the early modern period, the English. Having explored in the first three years the significant aspects of the societies in which Jerusalem, Athens, Rome, and London emerged as iconic cities, students are prepared well for understanding the significance of the society that found Philadelphia at its center in 1776 and 1787. Embodied in the Puritans, the older covenant tradition of the people of Israel provides a powerful point of departure for the American story. The course pays particular attention to the Puritan habit of self-governance, which Alexis de Tocqueville contends is the seed of American liberty. Jefferson's *Notes* reveal the anxiety and dismay over owning slaves in a nation rooted in natural liberty; Jefferson's agrarianism also provides an alternative view to an emergent individualism and commercialism. *The Federalist Papers* furnishes the constitutional morality behind the American contract. Lincoln ponders the integral connection between the *Declaration of Independence* and the *Constitution*, a tie that the founders articulate both through their earliest legislation and their written documents. The great writers of fiction take the American story into the depths of world myth. In his great American fable *Moby-Dick*, Melville imagines a ship--a regime, a civilization--taken captive by a quest for metaphysical retribution. In Twain's *Huckleberry Finn*, the journey of Huck and Jim down the Mississippi exposes both the greatness and the flaws of the American experiment in human liberty. Students come to understand that the American Tradition is wrought with many intrinsic tensions, exacerbated by place and pluralism, and yet leavened by America's ancestry in the old Mosaic strain.

	<i>Mayflower Compact, Massachusetts Body of Liberties, Puritan Writings</i>
Jefferson	<i>Notes on the State of Virginia</i> <i>Virginia Declaration of Rights</i> <i>The Declaration of Independence</i> <i>The Constitution</i> <i>The Federalist Papers</i>
Tocqueville	<i>Democracy in America</i>
Melville	<i>Moby-Dick</i>
Lincoln	<i>Temperance Address, Lyceum Speech, Cooper Union Address, Gettysburg Address, Second Inaugural</i>
Twain	<i>Adventures of Huckleberry Finn</i>

HMN 402 Modernity and Postmodernity (3 credits)

In the years when the Civil War was testing the fabric of the American republic, Fyodor Dostoevsky in Russia was engaged in a profoundly prophetic examination of the fruits of Enlightenment and Romantic thought in the modern world. His character Raskolnikov, thinking both as a utilitarian and a romantic, murders an old woman to see if he can step over the lines of traditional morality and become a benefactor of mankind. Like Dostoevsky's character, Nietzsche dismantles both traditional morality and Enlightenment reason; he proposes stepping over all boundaries on the way to the *übermensch*, the superman. In this final course comes the most complete flourishing of modernity as well as the beginning of the postmodern world in which we live. The works of Conrad, Yeats, Joyce, and Faulkner show the Western imagination grappling with the challenge of a world that has lost touch with its central tradition. By the course's end, two different paths emerge: on the one hand, the continuation of Nietzsche's project, dismantling faith, reason, and the tradition itself; on the other hand, the impassioned confession of Christian artists, Flannery O'Connor, and T. S. Eliot, who respond to the collapse of rationalism with the renewed fusion of faith and reason and with the perennial witness of Christian life that has the potential to reinvigorate our world.

Nietzsche	"On Truth and Lying in a Non-Moral Sense"; excerpts from <i>Twilight of the Idols</i> and <i>Thus Spake Zarathustra</i>
Freud	Chapter III from <i>Civilization and Its Discontents</i>
Heidegger	"The Question Concerning Technology"
Foucault	"Panopticism" from <i>Discipline and Punish</i>
Dostoevsky	<i>Crime and Punishment</i>
Conrad	<i>Heart of Darkness</i>
Joyce	"Araby," "Counterparts," and "The Dead" from <i>Dubliners</i>

Eliot	<i>The Waste Land; Four Quartets</i>
Poetry packet	Rilke, Yeats, Frost, and the Fugitive-Agrarians
Faulkner	<i>Go Down, Moses; The Reivers</i>
O'Connor	Selected stories

THEOLOGY CURRICULUM

In his encyclical *Fides et Ratio* St. John Paul II teaches that we acquire sure knowledge of truth in two ways, by reason and by faith, the respective objects of which are natural truth and revealed truth. Theology is the study of revealed truth in the light of divine faith.

In the Theology curriculum at Wyoming Catholic College, each student attains a synoptic view of revealed truth by studying in a reverent and well-ordered manner the fundamentals of sacred doctrine in all the major divisions of its subject-matter, that is, the different mysteries of faith. The presupposition for doing this fruitfully is a personal relationship with the Lord Jesus Christ, since we can enter into the *object* of faith only by becoming a *subject* of faith, one who responds to God's self-revelation with an abandonment that is both intellectual and loving.

The content of revelation, or deposit of faith, has come down to us through Scripture and Tradition, authentically interpreted, taught, and guarded by the Magisterium of the Catholic Church. Wyoming Catholic College, in fulfillment of its obligation to be an institution of *Catholic* liberal education, is therefore staunchly faithful to the Magisterium.

The Theology curriculum derives from and is ordered to the fundamental mysteries of the Catholic faith, namely, the Trinity and the Incarnation, proceeding in an orderly manner from what is prior to what is posterior in the order of our understanding (e.g., one cannot understand the meaning of "the Word became flesh" until one has pondered the Word begotten of the Father before all ages).

Moreover, because Sacred Scripture, Sacred Tradition, and the Church's teaching authority or Magisterium are indissolubly bound in unity, as Vatican II's *Dei Verbum* teaches, theology at Wyoming Catholic College is characterized by a deep and sustained encounter with all three of these constitutive elements. Over the span of eight semesters, students ponder the mysteries of theology while sitting at the feet of the best teachers: the inspired authors of Scripture, the great Fathers and Doctors of the Church, the bishops in council, and the popes to whom the Lord has entrusted his flock.

Pope Benedict XVI has said: "When theology is not essentially the interpretation of the Scripture in the Church, this theology has no foundation anymore." At Wyoming Catholic College, the Word of God stands at the very

heart of our program. A vivid sign is our study of the four Evangelists: freshmen study St. Luke's Gospel and Acts in their salvation history context; sophomores pore over St. John's Gospel multiple times from different angles; juniors read the Gospels of St. Matthew and St. Mark. Students are thus taught that their studies begin and end in the school of the Gospel, at the feet of the Teacher who is the Way, the Truth, and the Life.

Throughout the theology curriculum we take as a trustworthy guide St. Thomas Aquinas, of whom St. John Paul II wrote:

In his thinking, the demands of reason and the power of faith found the most elevated synthesis ever attained by human thought, for he could defend the radical newness introduced by Revelation without ever demeaning the venture proper to reason. (Encyclical *Fides et Ratio*, §78)

Echoing dozens of popes before him over a span of seven centuries, Bl. Pope Paul VI stated that we must listen with respect to the Doctors of the Church, among whom St. Thomas Aquinas holds the principal place.

For so great is the power of the Angelic Doctor's genius, so sincere his love of truth, and so great his wisdom in investigating the deepest truths, in illustrating them, and linking them together with a most fitting bond of unity, that his teaching is a most efficacious instrument not only for safeguarding the foundations of the faith, but also in gaining the fruits of healthy progress with profit and security. (Address at Gregorian University in 1964)

St. John Paul II explained that this approach is the only one consistent with Vatican II:

The words of the Council are clear: the [conciliar] Fathers saw that it is fundamental for the adequate formation of the clergy and of Christian youth that it preserve a close link with the cultural heritage of the past, and in particular with the thought of St. Thomas; and that this, in the long run, is a necessary condition for the longed-for renewal of the Church. (Address to International Thomistic Congress in 1979)

SPIRITUAL FORMATION

The students' spiritual formation should be a priority at a Catholic institution. The first step of such formation is to cover the organic field of doctrine, with teachers impressing upon their students the moral and spiritual import of the matters being studied. The second and even more important step

is to provide a Catholic environment in which rites and devotions are widely available and warmly embraced. The third step is *training* in spirituality, which takes place through spiritual direction, classes, and retreats dedicated to the practice of prayer and the goal of union with God.

Each year two retreats are offered. The Fall Retreat focuses on fruitful participation in the Church's liturgical and devotional life. The Easter Retreat, led by a visiting retreat-master, coincides each year with the celebration of the great Triduum of Holy Thursday, Good Friday, and Holy Saturday. Various theology practica are offered every semester to students as voluntary opportunities to develop their spiritual lives. These practica focus on building up the interior life of the student, in complementarity with the academic curriculum. In this way the profound implications of theology for one's personal life have an opportunity to be drawn out and applied very concretely to our ongoing discipleship to Christ. Practica are based on such texts as St. Francis de Sales's *Introduction to the Devout Life*, St. Teresa of Jesus's *Way of Perfection*, St. John of the Cross's *Living Flame of Love*, and St. Ignatius of Loyola's *Spiritual Exercises*.

By persevering in the Theology curriculum, students will:

1. Obtain a synoptic view of revealed truth through a well-ordered study of all the major divisions of its subject matter.
2. Come to understand the way in which theology as a speculative science is the "queen of the sciences."
3. Interact directly with the three sources of theology, namely Scripture, Tradition, and the Magisterium.
4. Acquire habits appropriate to interaction with each of these sources individually.
5. Grow in the disposition necessary for any fruitful interaction with any of these sources, namely friendship with God.
6. Learn to articulate the virtues of the Catholic life and grow in a desire to live them.
7. Reflect on what theology, as a practical science, demands of them in the current age.

COURSES

THL 101 Salvation History I (3 credits)

Following the teaching of the Dogmatic Constitution on Divine Revelation *Dei Verbum* of the Second Vatican Council, the *Catechism of the Catholic Church* explains that Scripture stands at the heart of both theology (the contemplative study of divine things) and catechesis (the handing on of the content of the Faith). Since theology begins with knowledge of the saving deeds of God in Jesus Christ, who is Lord of history from the creation of the world to its consummation, the first and fundamental year of theology at Wyoming Catholic College familiarizes students firsthand with the history of salvation as God tells

it to us in the words He Himself inspired. The first semester focuses on the Old Testament as background to and promise of the New.

Scripture	Genesis, Exodus, Numbers, Deuteronomy, Joshua, Judges, 1 & 2 Samuel, 1 & 2 Kings, Ezra, Nehemiah, selections from the prophetic writings (Isaiah, Jeremiah, Ezekiel, Daniel), 1 Maccabees
-----------	---

THL 102 Salvation History II (3 credits)

Continuing the history of salvation, the second semester enters into the New Testament, whose very completion of the Old Testament furnishes a pattern for Christian life and thought, passing from shadows to images to realities. Accordingly, this semester also takes up questions of the inspiration, inerrancy, and interpretation of Scripture as containing many “senses” or levels of meaning and investigates how theology is built on the foundation of the Word of God, how this Word is handed down to us in Scripture and apostolic Tradition, how faith is related to reason, and how theology differs from other disciplines in its role as queen of the sciences.

Scripture	Gospel of Luke, Acts of the Apostles, Romans, Hebrews, Revelation
St. Vincent of Lerins	<i>Commonitory for the Antiquity and Universality of the Catholic Faith</i>
St. Augustine	<i>On Christian Doctrine</i>
St. Thomas Aquinas	<i>Summa theologiae</i> I.1
Vatican I	<i>Dei Filius</i> (optional)
Leo XIII	<i>Providentissimus Deus, Satis Cognitum</i> (optional)
Vatican II	<i>Dei Verbum</i>

THL 201 The Mystery of the Trinity (3 credits)

Having viewed salvation history as a whole through the inspired record of that history and having considered how the science of theology emerges and develops from divine revelation given in both Scripture and Tradition (THL 101–102), we are ready to begin a more systematic study of the Catholic faith. Since God is the source and goal of everything else, the present course focuses on the existence and attributes of God Himself, leading into the central mystery of our Faith, the Most Holy Trinity. With the Gospel of St. John as our portal, we enter into God’s disclosure of His inner life: the Divine Persons and their missions.

Scripture	Gospel of John, 1 John
Arius	<i>Thalia, Letter to Eusebius of Nicodemia, Letter to Alexander of Alexandria</i>
Alexander of Alexandria	<i>Letter to Alexander of Thessalonica</i>
Church Councils	Council of Antioch, Ecumenical Councils of Nicea I, Constantinople I, Florence; Athanasian Creed

St. Gregory Nazianzen	<i>Theological Orations III – V</i>
St. Thomas Aquinas	<i>Compendium theologiae</i> 1–56, <i>Summa theologiae</i> I.43.1
Leo XIII	<i>Divinum Illud Munus</i>

THL 202 Creation and Providence (3 credits)

In this course we strive to understand God as the origin and goal of all creatures and their sovereign ruler. We ask about the meaning of “creation” and explore the creation of the invisible world of the angels, the visible cosmos, and especially man, the summit of the material world because he is made “unto the image and likeness of God.” Particular attention is given to the manifestation of God’s goodness in the perfections of creatures, and especially in the gift of sanctifying grace and the theological virtues to men. Also taken up is the question of evil in the perspective of Divine Providence.

Scripture	Genesis 1–3, Psalms 8, 33 and 104, Wisdom of Solomon, Job
St. Thomas Aquinas	<i>Compendium theologiae</i> 68–77, 96–147; <i>Summa theologiae</i> I-II, qq. 62, 109–110
Church Councils	Council of Carthage, Synod of Orange
St. Augustine	<i>On the Grace of Christ</i>

THL 301 Sin and Redemption (3 credits)

This course treats of the fall of the human race in our first parents, sin and its effects (particularly death), resurrected beatitude as man’s ultimate end, and Jesus Christ as the sole mediator between God and man who brings redemption and renewal to the whole of creation. The plight of fallen man as well as its only remedy are illuminated by readings from both Testaments, leading to profound reflection on the reasons why “the Word became flesh and dwelt among us”—“for us men and for our salvation.”

Scripture	Genesis 1–3, Leviticus, Ecclesiastes, Gospel of Mark, Colossians, Philippians, Hebrews
St. Athanasius	<i>On the Incarnation</i>
St. Anselm	<i>Why God Became Man</i>
St. Maximus the Confessor	<i>On the Lord’s Prayer</i>
St. Thomas Aquinas	<i>Compendium theologiae</i> 148–201
St. John of the Cross	<i>Romances on “In the beginning”</i>

THL 302 The Mystery of the Incarnation (3 credits)

This semester meditates on the mystery of the Incarnation, towards which the whole of creation is ordered as its crown and upon which the entire economy of grace and salvation hinges. The Christological debates of the early Church reveal to us the radiant face of Jesus Christ, true God and true man, while the unsurpassable synthesis of St. Thomas assists us in pondering His eternal and

incarnate being, His grace and wisdom, His salvific suffering and death, His glorious resurrection and ascension, and finally, His kingship over creation.

Scripture	Gospel of Matthew
Church Councils	Ephesus, Chalcedon, Constantinople III, Nicaea II
St. Cyril of Alexandria	<i>On the Unity of Christ</i>
St. Leo the Great	<i>Letter to Flavian (Tome of Leo)</i>
St. Maximus the Confessor	<i>Ambiguum V</i>
St. John Damascene	<i>In Defense of the Holy Images</i> , Treatise I
St. Thomas Aquinas	<i>Compendium theologiae</i> 202–246; <i>Summa theologiae</i> III.8 q. 8

THL 401 The Body of Christ (3 credits)

This course treats of the Church—the Mystical Body of Christ, His immaculate bride, the new Israel, the “universal sacrament of salvation” born from the Lord’s wounded side. Inseparable from the Church on earth are her seven sacraments and liturgical life, through which she expresses her inmost nature as a continuation of the mystery of the Incarnation. Through these visible means, our Savior applies the power of His Passion to our bodies and souls, building up His Church, sanctifying her members, and uniting the faithful to one another and to God in the sacrifice of charity.

Scripture	Ephesians, 1 Corinthians
St. Ignatius of Antioch	<i>Letters</i>
St. Cyril of Jerusalem	<i>On the Christian Sacraments</i>
St. Augustine	<i>On the Gospel of John</i> X. 10–11
Pius XII	<i>Mystici Corporis, Mediator Dei</i>
St. Thomas	<i>Summa contra gentiles</i> III. 119; IV, 56–77
St. John Paul II	<i>Ecclesia de Eucharistia</i> (optional)
Vatican II	<i>Lumen Gentium; Sacrosanctum Concilium</i>
Catechism of the Catholic Church	Readings on liturgy and the sacraments

THL 402 Life in Christ (3 credits)

This course addresses itself to profoundly practical questions about how we are to live a redeemed and sanctified life in the world around us, as individuals and as members of communities. Such a life is founded upon the theological virtues of faith, hope, and charity; it is given a certain structure by vocations within the Church. The Christian way of life both separates us from “the world” (the world of unbelief) and impels us to evangelize it in imitation of our Lord. The contrast between true and false freedom and the central role played by culture are major themes of the semester.

Scripture	Florilegium of New Testament texts
Anonymous	<i>Epistle to Diognetus</i>
Constantine & Licinius	<i>Edict of Milan</i>
Theodosius	<i>Codex Theodosianus</i> excerpts
Gelasius I	<i>Duo Quippe Sunt</i>
Boniface VIII	<i>Unam Sanctam</i>
Locke	<i>A Letter Concerning Toleration</i>
Leo XIII	<i>Immortale Dei, Libertas Praestantissimum, Sapientiae Christianae, Au Milieu des Sollicitudes, Longinqua Oceani, Rerum Novarum, Diuturnum Illud</i>
Pius XI	<i>Quadragesimo Anno, Casti Connubii, Quas Primas</i>
Pius XII	<i>Ci Riesce</i>
Vatican II	<i>Dignitatis Humanae</i>
St. John Paul II	<i>Veritatis Splendor, Evangelium Vitae, Centesimus Annus</i>
Benedict XVI	<i>Deus Caritas Est</i>
St. Thomas Aquinas	<i>On the Perfection of the Spiritual Life</i>

PHILOSOPHY CURRICULUM

To understand the importance of philosophy, we need only consider the kinds of questions philosophers deal with: Which is more fundamental, unity or plurality, order or chance, mind or matter? How is it that unintelligent beings act with purpose? What are the basic principles of nature? What are motion, time, and space? Is death the end or is the soul immortal? Is there a God? What is the good life, and what is happiness? The desire to seek answers to questions such as these ought to be among the chief concerns of any institution offering a liberal education.

In the encyclical *Fides et ratio*, Saint John Paul II pursued the theme of faith and reason and the discipline of philosophy in man's journey because "at the present time in particular, the search for ultimate truth seems often to be neglected" (§5). Agnosticism, relativism, and skepticism have spread to all walks of life. As the late pontiff wrote: "We see among the men and women of our time, and not just in some philosophers, attitudes of widespread distrust of the human being's great capacity for knowledge" (ibid.). Yet with patient concentration and sound reasoning, and under the guidance of trustworthy teachers, one can pursue philosophy in such a way as to come to know universal truths of the most profound importance that also help confirm and deepen one's supernatural faith.

Wyoming Catholic College offers a traditional Philosophy curriculum, with the proper subjects in their proper order, aiming at the goal of wisdom: to know the ultimate causes that apply to all orders of being. These subjects are logic, philosophy of nature, philosophy of man, ethics, politics, and metaphysics. Throughout the Philosophy curriculum, we examine common human experience via dialectic and demonstration to attain universal principles and conclusions about reality.

The primary author in the five-semester Philosophy sequence is Aristotle, whom St. Thomas Aquinas referred to as the Philosopher and Dante as "the master of those who know . . . by all admired and by all revered." Among his admirers stands Blessed John Henry Newman, who wrote in *The Idea of a University*:

Do not suppose, that in thus appealing to the ancients, I am throwing back the world two thousand years, and fettering Philosophy with the reasonings of paganism. While the world lasts, will Aristotle's doctrine on these matters last, for he is the

oracle of nature and of truth. While we are men, we cannot help, to a great extent, being Aristotelians, for the great Master does but analyze the thoughts, feelings, views, and opinions of human kind. He has told us the meaning of our own words and ideas, before we were born. In many subject-matters, to think correctly, is to think like Aristotle; and we are his disciples whether we will or no, though we may not know it. (Discourse 5)

By persevering in the Philosophy curriculum, students will:

1. Form the habits of inquiry, dialectic, demonstration, and analogy through applying Trivium skills to concrete considerations.
2. Gain insight into the real world by learning the recurrent debates, first principles, and chief conclusions in the major divisions of the perennial philosophy.
3. See how these debates, principles, and conclusions bear upon the content of other disciplines studied in the program, and how those other disciplines illuminate philosophical arguments.
4. Grasp the unity, differences, and connections of the various parts of philosophy through an orderly sequence of study.
5. Grapple with points of view different from their own, both in the form of theories presented in the classic texts studied in the philosophy curriculum and in the form of teacher interventions and student objections that challenge students to offer a coherent, reasoned argument.

COURSES

PHL 101 Tools of Philosophy (3 credits)

This course introduces students to the science of logic, the fundamental prerequisite to the study of philosophy. The chief part of the semester is devoted to the three acts of the intellect, apprehension, assertion, and deduction. Students consider the nature of the intellect’s act in grasping concepts and naming them, and the distinction of univocal and equivocal speech that follows upon this, treating at some length the equivocality of being and its highest genera through a study of Aristotle’s *Categories*. Next, the act of assertion or predication is considered, and then the formation and use of syllogisms and deductive reasoning. In the last part of the semester, students study the application of these concepts to the principles of demonstration and reasoning and to the pursuit of knowledge through the philosophical act.

Aristotle	<i>Categories; On Interpretation, Prior Analytics, and Posterior Analytics</i> , selections
St. Thomas Aquinas	<i>Commentary on the Posterior Analytics</i> II.19
Pieper	“The Philosophical Act”
Plato	<i>Cratylus, Meno</i>
Porphyry	<i>Isagoge</i>

PHL 102 Philosophy of Nature (3 credits)

This subject is often called the “general science of nature” because it investigates and establishes the general presuppositions of the three major sciences of biology, physics, and chemistry, which study material beings from more particular vantages. In this course, students study *ens mobile* (mobile being)—that is, material things insofar as they change, which is the most obvious truth about them. We differentiate between substantial and accidental change, reason to the ultimate principles that explain change, grasp the distinction between potency and act, relate nature, art, and chance to one another, compare absolute and hypothetical necessity, probe the four kinds of causes (formal, material, efficient, and final), and seek out the definition of motion.

Aristotle	<i>Physics</i> I–III
St. Thomas Aquinas	<i>Commentary on Physics</i> III 1–3; <i>On the Principles of Nature</i>
Plato	<i>Timaeus</i> and <i>Phaedo</i> , selections
Presocratics	Fragments

PHL 201 Philosophy of Man (3 credits)

The focus of this course is living material beings, especially their pinnacle, man. What is the definition of life and what are the activities of living? How are living things different from nonliving creatures and machines? What is a human being? How does man differ from other animals? Related topics include the external and internal sense powers, the passions, the rational powers of intellect and will, the unity of body and soul, and the immortality of the human soul.

Aristotle	<i>On the Soul</i> ; <i>Parts of Animals</i> , selections
St. Thomas Aquinas	<i>Commentary on Aristotle's On the Soul</i> ; <i>Compendium theologiae</i> 78–90
Baldner, De Koninck, George, Johnson, Kass, Talbott, Tallis	Selected essays

PHL 301 Ethics (3 credits)

Having considered the nature of man in PHL 201, we move on in PHL 301 to a consideration of the proper *action* of man that follows upon his nature. Ethics is the study of human acts as they are ordered to the full flourishing of man on the natural level. Since happiness (under one name or another) is the ultimate end sought by all, ethics deals perforce with the question: What is happiness and how does one attain it? This inquiry necessarily leads to related topics, such as mistaken notions of happiness, the moral and intellectual virtues and their corresponding vices, justice, friendship, and the natural moral law.

Aristotle	<i>Nicomachean Ethics</i>
St. Thomas Aquinas	<i>Summa theologiae</i> I-II, selections

PHL 401 Politics (3 credits)

Politics is the study of man as a “social animal” who forms political bodies—cities or states—ordered to the common good (or, when corrupted, to private goods at the expense of truly common goods). Politics deals with questions such as: What are family, society, and state, and how do they stand vis-à-vis one another? What are the various forms of government and their relative strengths and weaknesses? What constitutes good or bad rulership and citizenship? To help us answer these questions, we will study a number of historically influential and philosophically paradigmatic approaches to answering these questions—those of Aristotle, Augustine, Aquinas, Hobbes, Locke, and Rousseau.

Aristotle	<i>Politics</i>
St. Thomas Aquinas	<i>On Kingship; Summa theologiae</i> I-II.90–97
St. Augustine	<i>The City of God</i> , selections
Hobbes	<i>Leviathan</i> , selections
Locke	<i>Second Treatise of Government</i>
Rousseau	<i>Discourse on the Origin of Inequality</i>

PHL 402 Metaphysics and Modern Philosophy (3 credits)

Metaphysics is the study of being as being. The metaphysician seeks to know the ultimate principles of everything that exists, exploring such topics as the analogy of being and the sciences of being, the derivation of the many from the one, the principle of non-contradiction, the primacy of substance, the division of being by act and potency, and the distinction between existence and essence, seeking above all to know the First Cause from which all finite being emanates, and something of this Cause’s attributes. In addition to metaphysics’ scientific, timeless character, it has had a long and complicated historical development—ancient, scholastic, modern, and post-modern—the understanding of which is vitally important for retrieving and reassessing the classical tradition in modern times.

Aristotle	<i>Metaphysics</i> I, II, and IV
St. Thomas Aquinas	<i>On Being and Essence</i> , Prologue to <i>Commentary on Aristotle’s Metaphysics</i>
Descartes	<i>Meditations on First Philosophy, Discourse on Method</i>
Gillespie	“The Theological Origins of Modernity”
Gilson	<i>The Unity of Philosophical Experience</i>
Hegel	<i>The Philosophy of History</i> , selections
Hume	<i>Enquiry Concerning Human Understanding</i> , selections
St. John Paul II	<i>Fides et ratio</i> , selections
Kant	<i>Prolegomena to Any Future Metaphysics</i>
Kierkegaard	<i>Philosophical Fragments</i>
Nietzsche	<i>On Truth and Lying in a Non-Moral Sense</i>

FINE ART CURRICULUM

The study of the fine arts of the Western tradition is an integral part of the education offered at Wyoming Catholic College. This curricular track complements other tracks by enabling students to see how philosophical and theological ideas throughout history have found expression in artifact and culture, as well as by showing students how beauty is an inseparable aspect of truth. Thus, the Fine Arts curriculum, like the Humanities curriculum, concerns itself simultaneously with the realm of history and the realm of ideas. In addition, the study of how ideas have shaped culture in the past inspires students to reshape our present culture in the light of truth. In this way, the study of music and visual art also advances the College's mission to form well-educated leaders for both the Church and society.

Toward the end of *City of God*, St. Augustine refers to the end of time, when all the faithful followers of Christ will enjoy the presence of God in the beatific vision: "In the end, we shall be still. We shall be still, and we shall see. We shall see, and we shall love. We shall love, and we shall praise." Man is ordered to knowing the truth, but knowing this truth in its fullness involves recognizing its beauty, and ecstatically passing over into it. The truth of revelation not only satisfies man's intellect, it warms his heart and calls forth his love.

In a special way, then, the Fine Arts Curriculum seeks to develop attentiveness to the manifold traces of the beauty of God, His attributes and His mysteries, through the study of great artistic achievements from ancient times to the modern era. The courses weave theological reflection into their historical framework, helping students recognize the *veritatis splendor*, the splendor of the truth they encounter elsewhere in the curriculum, especially in Theology and Philosophy. The ultimate goal is therefore not only to acquaint students with the development of Western art in its key periods, artists, masterworks, and themes, but also to nourish in students love for the truth and the conviction that the transforming power of God's truth elevates all of our cultural activities.

By persevering in the Fine Arts curriculum, students will:

1. Come to see how great ideas throughout Western history have found concrete expression in culture, and how culture thus formed shapes the people who partake of it.
2. Observe and interpret works of fine art according to their formal principles and in relationship to the history of ideas.
3. Appreciate the relationship, as expressed in the past and in the present,

between beauty and truth, aesthetics and rationality.

4. Become acquainted with the historical development and contextualization of the fine arts.

5. Gain a better understanding of the process of artistic production.

FINE ARTS CURRICULUM: MUSIC

Shakespeare, in *The Merchant of Venice*, has the lover Lorenzo pass judgment on the man of unmusical soul:

The man that hath no music in himself,
Nor is not moved with concord of sweet sounds,
Is fit for treasons, stratagems and spoils,
The motions of his spirit are dull as night,
And his affections dark as Erebus:
Let no such man be trusted. Mark the music. (V, i, 83–88)

All cultures value music and, as did Shakespeare's Lorenzo, either pity the man who has none or judge him "fit for treason." The ancient Greeks claimed that the gods Apollo, Amphion, and Orpheus invented and inspired this noblest of arts. Ancient Hebrew services contained chanted psalms and prayers, which the early Christian church retained in its worship. These it brought to perfection in the art of Gregorian chant, which became not only the liturgical music of the Catholic Church, but also the supreme exemplar of pure melody in flowing rhythm, at the service of transcendent Beauty.

Plato defines music as sound ordered by rhythm and melody, its origin being the passions in the soul of the musician and its purpose being to move the passions of the listener. Since music has to do with ordering (or disordering) the listener's passions, thus making him more (or less) reasonable and sensitive to the divine, and since music itself is susceptible to rational analysis even while it leads beyond reason, it follows that training in the theory, history, and practice of music belongs in the curriculum of liberal education. Indeed, for centuries music was taught as one of the four liberal arts that comprise the quadrivium—the others being arithmetic, geometry, and astronomy, which are studied in Wyoming Catholic College's Mathematics and Science curricula.

In our Music curriculum, students

1. gain familiarity with the elements and language of music: sound, rhythm, melody, modes and keys, harmony, forms, periods, and styles;
2. understand how pitch, harmony, and rhythm are rooted in the physical nature of sound and how these are susceptible to mathematical and ethical analysis;
3. learn the historical development of Western music by focusing on major composers and works, from the Middle Ages to the present;

4. receive a grounding in the sacred music of the Catholic tradition, about which Vatican II declares: “The musical tradition of the universal Church is a treasure of inestimable value, greater even than that of any other art.”

Intelligent listening requires some theory and practice; conversely, theory and practice are enlivened by listening to music. The Music curriculum therefore combines lessons in theory, practical exercises, and frequent listening to music, all ordered to developing an educated ear. Moreover, our appreciation of music grows through learning about the great composers and their specific contributions to the art of music. Without lapsing into historicism, we can learn to be sensitive to historical context, biography, and artistic development over time. Such knowledge is a key step in the transition from being a passive listener who likes to be surrounded by pleasant noise to being an active, critical, and appreciative listener who approaches the “inside” of the art.

COURSES

ART 301 Music in the Western Tradition I (3 credits)

Students begin the study of music with elements of music theory, including rhythms in simple and compound time signatures, pitch and melody, key signatures, the circle of fifths, scales and intervals. Led by the ancient Greeks, we discover the relationships between music, mathematics, nature, and the human soul. Then ensues the first half of a guided tour of western musical history, starting in the early Middle Ages, continuing through the Renaissance, and focusing, in the Baroque period, on the work of three great masters, Vivaldi, Bach, and Handel. Throughout, attention is given not only to great works of different composers but also to the overall development of musical styles. Observations touching the aesthetics, spirituality, and morality of music are also made, foreshadowing a central concern of the second semester.

Boethius	<i>Fundamentals of Music</i> , Book I
Zuckermandl	“The Two Concepts of Musicality”
Kalkavage	<i>Elements of Music</i>
Tolkien	“Ainulindale” from <i>The Silmarillion</i>
Lewis	“The Founding of Narnia” from <i>The Magician’s Nephew</i>
Bach	<i>St. Matthew Passion</i>
Pelikan	“The Beauty of Holiness”
Pieper	“Thoughts about Music,” “Music and Silence”

ART 302 Music in the Western Tradition II (3 credits)

Much of the second semester of the music curriculum is dedicated to the aesthetics, morality, and spirituality of music, and the relationship between music and the other arts. This semester continues the study of music history with major figures of the Classical, Romantic, and Modern periods.

Plato	<i>Laws II, selections from the Republic</i>
Berquist	"Good Music and Bad"
Mozart	<i>Requiem</i>
St. Pius X	<i>Tra le Sollecitudini</i>
Ratzinger	"Music and Liturgy," "The Image of the World and of Human Beings in the Liturgy and Its Expression in Church Music"
St. John Paul II	<i>Letter to Artists</i>
Benedict XVI	<i>Address to Artists</i>
Bloom	"Music" from <i>Closing of the American Mind</i>
Tindal-Atkinson	"The Music of a Dead Culture"
Storck	"Mass Culture or Popular Culture"

COLLEGE CHOIR AND SCHOLA

The Wyoming Catholic College Choir performs a wide repertoire of choral music by great composers such as Palestrina, Victoria, Tallis, Byrd, Bach, Mozart, and Bruckner. The Choir sings at Mass on Sundays and Holy Days. Public performances of sacred and secular music, including trips out of town to sing at important events, are scheduled from time to time. The Choir has recorded several CDs of seasonal and liturgical music.

The Schola is an ensemble dedicated to singing the Gregorian chant appointed by the Church for Sundays and other feast days. Through study and rehearsal of plainchant, members learn how to execute it skillfully for the glory of God and the edification of the faithful.

In recognition of the hard work and commitment of Choir and Schola members and of the significant contribution they make to the College's common good, participation in either ensemble is recorded on the official College transcript.

FINE ARTS CURRICULUM: VISUAL ARTS

Over the two semesters of their senior year, students continue their discovery of the fine arts by learning about the painting, sculpture, and architecture of Europe and its historical development from ancient Greece to early Christian Rome, from Byzantium to the Latin Middle Ages, from the Florentine Renaissance through the Baroque era. The Visual Arts sequence, in tandem with the Music sequence, powerfully demonstrates how the intellectual or spiritual questions, problems, and ideas of each age take on concrete, visible, cultural expressions that, in turn, form the souls of the people who view, use, or inhabit them.

COURSES

ART 401 Visual Arts in the Western Tradition I (3 credits)

Having studied the “Greek miracle” in Humanities and Philosophy, seniors in ART 401 observe how the rise of rigorous philosophy in ancient Athens was matched by, and embodied in, the great architectural and sculptural achievements of the age. Students revisit Plato in his historically influential dialogue, *Timaeus*, and explore how Polykleitos, the greatest Greek sculptor, created a system of proportions, not only to render the full beauty of the human body but also to show humanity’s privileged place in the created universe. Having already seen in Humanities how the Romans inherited the Greek intellectual tradition, they now study how the Romans were the heirs of Greek artistic achievements and how they built upon those achievements. The first semester closes with an introduction to early Christian and Byzantine art, with special attention given to how Christian theology refreshed and renewed the ancient artistic traditions it inherited.

Janson *History of Art*

Jensen *Face to Face: Portraits of the Divine in Early Christianity*

ART 402 Visual Arts in the Western Tradition II (3 credits)

This semester commences with the story of how Christian monastic communities banded together and refashioned culture out of the ruins of the collapsed Roman Empire. Having previously read the theological and spiritual masters of the monastic age, such as St. Anselm and St. Benedict, students begin to see how their rich ideas on the love of God and the prayerful response of man found expression in intricate illuminated manuscripts. The careful and detailed reasoning of scholastic treatises took analogous form in Gothic architecture. Indeed, we find some of the most exquisite fruit of that rich medieval theological speculation in the spires and stained glass of the great Gothic cathedrals, in the wealth of sculptural forms, and in the devotional paintings of Giotto, so steeped in beauty and love. Students are introduced to the Renaissance through the masterpieces of Fra Angelico, Raphael, and Michelangelo, learning how these artists saw in the Incarnation of the Word a reconciliation between the reason of the ancients and the faith of the saints. The semester concludes with the exuberant architecture, sculpture, and painting of the Baroque era, a sublime expression of the radiant glory of God reflected upon the face of the Church.

Janson *History of Art*

Panofsky *Gothic Architecture and Scholasticism*

von Simson *The Gothic Cathedral*

MATHEMATICS AND SCIENCE CURRICULUM

Mathematical disciplines constituted the entirety of the medieval quadrivium (arithmetic, geometry, music, and astronomy), for several reasons. Even at its most abstract, mathematics is a knowledge of the real physical world in its quantitative aspect; in the “mixed sciences,” such as music and astronomy, mathematics plays an important formal role, offering real insight into the natures of things. Moreover, the highly logical structure of mathematics and its freedom from the obscurities attendant on material being render it ideal for elementary training in reasoning, while the beauty of mathematics inspires wonder, manifests the beauty and order of the created world, and makes evident the ordering of the human mind to truth. Mathematical knowledge is thus at once an object of contemplation in itself, a direct instrument of scientific knowledge, and an indirect means of seeking to know anything whatsoever. As the Book of Wisdom declares: “Thou hast ordered all things in measure, and number, and weight” (Wis 11:21).

For ancient and medieval thinkers, “science” denoted any area of inquiry in which true, certain, and universal knowledge was achieved. Thus the term applied equally to theology, philosophy, and mathematics. The modern sense of the word, in which we use it here, is reserved for an empirically based knowledge of the workings of nature, as discerned through the experimental observation of phenomena. Because of the dominant role played in our world by science in this modern sense and the present neglect of natural philosophy, it is important for students to come to an understanding of the domains proper to each and of their true and intimate relation.

We can discern three different levels of scientific inquiry: that of *natural history*, in which particular data are gathered and provisionally organized; that of *natural science*, in which hypotheses and theoretical constructs are fashioned in the attempt to correlate these data; and that of *natural philosophy*, in which the data are subsumed by truly causal explanations of universal validity. The direct experience of the natural world through natural history greatly augments our sense of wonder, so essential for the intellectual life. Natural science (the second level) instills in the mind a sense of the order of the universe, while natural philosophy ultimately leads the mind to the recognition of the First Principle: “The heavens declare the glory of God” (Ps 19:1). While each level has its own methodology, their unification is an important goal of liberal education.

Through the courses in the mathematics and science track at Wyoming Catholic College, students will:

1. Become more attentive to the natural world in its detail and complexity.
2. Grow in a sense of wonder and love for mathematics and natural science.
3. Come to understand what mathematics and science are, what methods and principles are appropriate to them, and how to recognize non-mathematical or non-scientific writing.
4. Acquire a habit of thinking about mathematics and science from their first principles.
5. Gain a selective acquaintance with some of the most significant historical developments in science and mathematics.
6. Come to understand the relationship between mathematics, science, and other disciplines.

COURSES

SCI 101 Field Science I (2 credits)

The first of two semesters of field science, this course is an introduction to natural science through field study that puts students in direct contact with the local natural environment. Through the direct experience and methodical observation of the heavens, geological formations, flora, and fauna, observational skills are sharpened and a sense of wonder at nature and natural history is cultivated. Students spend much time outdoors, drawing and recording data in sketchbooks. Shorter scientific readings supplement the books listed below.

Leopold	<i>A Sand County Almanac</i>
Sibley	<i>Field Guide to the Birds of Western North America</i>
Chartrand	<i>Field Guide to the Night Sky</i>

MTH 102 Euclidean Geometry I (3 credits)

Euclid's *Elements* is the foundational text of mathematics in Western civilization. Without an understanding of this text, one cannot fully understand the most significant scientific and mathematical works of later eras, such as those by Galileo and Newton. This course studies Books I–VI, beginning with basic definitions, axioms, and common notions as established in Book I, and proceeding through introductory plane geometry, with a treatment of rectilinear figures (Books I–II) and circles (Books III–IV), as well as proportion theory, considered first in itself (Book V), then as applied to plane geometry (Book VI). Given the crucial role played by student-led demonstrations at the board, this semester and the following are skills classes.

Euclid	<i>Elements</i>
--------	-----------------

MTH 201 Euclidean Geometry II (3 credits)

This course continues with Books XI–XIII of Euclid's *Elements*, completing the geometrical works with a treatment of solid geometry and the method of

exhaustion, and culminating in the investigation of the five Platonic solids. Building on this foundation, the course then engages selections from the works of Apollonius and Archimedes on conic sections.

Euclid	<i>Elements</i>
Apollonius	<i>Conics</i> , Selections
Archimedes	<i>The Quadrature of the Parabola</i>

MTH 202 Mathematical Reasoning (3 credits)

This course gives students a formal foundation in the nature of mathematics, including its relationship to natural science and metaphysics. Following on previous courses’ focus on the mathematics of continuous quantity, the course begins by investigating discrete quantity through several important proofs in number theory. The course then turns to the modern conception of number, including rationals, irrationals, complex, algebraic, and transcendental numbers, and more generally, the modern effort to unify discrete and continuous mathematics, which gave rise to analytic geometry and the calculus. This unification makes possible the proof that several famous problems (e.g., doubling the cube), which were unsuccessfully attempted by the ancients, are in fact impossible to solve. These considerations allow for reflection on Euclid’s accomplishment, as well as the very nature of mathematics and axiomatic reasoning, in a much more profound way. This conversation is further deepened by St. Thomas’s reflections on the nature of mathematics. Students sharpen their mathematical reasoning skills and develop problem solving techniques through frequent exercises, and engage in discussions on the nature of numbers, the mathematical conception of logic, infinity, limits, and mathematical beauty.

Courant	<i>What is Mathematics?</i>
St. Thomas Aquinas	Selections on Mathematics

SCI 301 Scientific Reasoning (3 credits)

This course explores the mathematical methodology of empirical science through a consideration of the philosophical underpinnings of this methodology and through the study of probability and statistics. Students consider the processes of evaluating experimental evidence used to confirm or disconfirm testable hypotheses and learn to identify various fallacies in evidential reasoning.

Bacon	<i>Novum Organum</i> , Selections
Fisher	“The Mathematics of a Lady Tasting Tea”
Selected Readings	

SCI 302 Field Science II (2 credits)

The second of the two semesters of field science, this course provides students with the opportunity to take up field studies with the analytical, quantitative approach of modern empirical science. The tools of statistical reasoning acquired in the preceding semester allow for a more rigorous, firsthand experience of the application of the scientific method to natural observation.

SCI 401 Science and Natural Philosophy I (3 credits)

Having seen the method of modern science in action (SCI 301 and 302), students in the senior year pay closer attention to the relations between science, philosophy, and theology. Introductory readings in SCI 401 consider the relation between science and philosophy explicitly. The course traces the development of atomic theory from the ancients through Aquinas, Dalton and other 19th century experimentalists, Mendeleev, and progenitors of the 20th-century atomic and quantum-theoretical viewpoints. Apparent tensions between classical and modern views are resolved, and the contributions of both science and philosophy validated.

Augros	"Reconciling Science with Natural Philosophy"
Feynman	<i>The Character of Physical Law</i>
Course Manual	Extracts from the ancient atomists, Aristotle, Aquinas, Dalton, Thomson, Gay-Lussac, Avogadro, Cannizarro, Mendeleev; various modern authors on the rise of atomic and quantum-physical ideas
Aquinas	<i>De mixtione elementorum</i>
Eddington	"The Two Tables"

SCI 402 Science and Natural Philosophy II (3 credits)

In this course, students continue to ponder developments in modern science and their philosophical ramifications, with special attention to biology. Topics addressed include the relation of biology to the physical sciences, basic cell theory and genetics, and evolutionary theory, considered in light of scientific, philosophical, and theological reasoning. Focus is maintained on the ultimate goal of achieving a coherent synthesis of faith and reason.

Darwin	<i>The Origin of Species</i> , selections
Mayr	<i>Toward a New Philosophy of Biology</i> , selections
De Koninck	"The Lifeless World of Biology"
Dalrymple, Fairbanks, Behe, etc.	Selected papers
Bolin	"Darwin and Evolution"
St. Robert Bellarmine	<i>Letter to the Reverend Foscarini</i>
Pontifical Biblical Commission	<i>On the Historical Character of Genesis 1-3, Letter to Cardinal Suhard</i>
Pius XII	<i>Humani Generis</i>
International Theological Commission	<i>Communion and Stewardship</i>
St. John Paul II	<i>Address to the Pontifical Academy of Sciences</i>
Benedict XVI	Homilies and Addresses

TRIVIUM CURRICULUM

According to the ancient and medieval classification, the liberal arts are sevenfold, divided into the trivium (“the three ways”) and the quadrivium (“the four ways”). The classical quadrivium is comprised of arithmetic, geometry, astronomy, and music; the trivium is comprised of grammar, logic, and rhetoric.

In both the trivium and the quadrivium the goal is to form the soul through contemplation of the true, the beautiful, and the good; these “transcendentals,” as they are traditionally called, point to God Himself, in whom they are united. The trivium sequence at Wyoming Catholic College teaches students to attempt to embody these transcendentals in writing and speaking.

What does it mean to write truthfully? Even in matters of fact, it can be difficult to say everything necessary with the right balance and emphasis. About matters of opinion—whether Achilles’ curse on the Achaian army can be justified, whether Socrates was dangerous to traditional Athenian piety—it is never as simple as telling the truth rather than lying. Rather, to write truthfully, one must learn to acknowledge other perspectives, to reason through questions honestly, to use evidence without distorting it, and to make interpretations with conviction, but with a candid openness to more complete truths.

And what does it mean to write beautifully? Beauty is never merely the decoration of ideas; in the best writing, true beauty inheres in the very structure of thought. As the greatest writers of the tradition show, rhetorical tools—schemes and tropes, for example—can be mastered in ways that make them inseparable from the ideas they express. Virgil, Dante, and Shakespeare, for example, do not ornament their ideas so much as they think in characters, situations, images, and symbols, all of which are informed from the outset with a beauty of conception. Writing beautifully requires deep study and imitation of these supreme poetic uses of language.

Practically speaking, the culmination of rhetoric per se comes in public speaking aimed at the common good. In all times, evil men have used rhetoric to mislead people, but the great orators have saved nations and changed the course of history with the truth and beauty of their language. Acutely aware of their particular circumstances, they have roused the spirits of their people by showing them how to serve the transcendental good to which the souls of men rightly answer. In our own time, the absence of great rhetoric has too often left public

life adrift, without a sense of high purpose. This sequence in rhetoric, which culminates in the junior author project and the senior thesis, is meant to point the students of Wyoming Catholic College toward high responsibility and to give them a sense of language that always appeals, in Lincoln's great phrase, to "the better angels of our nature."

By persevering in the Trivium curriculum, students will:

1. Think, write, and speak clearly and effectively, with consideration of the truth and validity of their statements as well as sensitivity to genre, audience, and purpose.
2. Find, analyze, and synthesize information and use this information judiciously.
3. Communicate intelligently, thoughtfully, and persuasively with people of differing opinions and stances.
4. Understand Grammar, Logic, and Rhetoric both as arts and sciences, seeing them as the foundations for all human thought, discourse, and culture.

COURSES

TRV 101—Writing Truthfully: An Introduction to the Trivium (3 credits)

This course serves as an introduction to collegiate writing, with a special emphasis on clarity, invention of theses, and organization of thought. Students write multiple essays in order to develop in their ability to appeal through *logos*, *pathos*, and *ethos*.

TRV 202—Political Rhetoric and the Common Good (3 credits)

Having mastered the foundational skills of written rhetoric, students advance in this semester to the study of great orations. Drawing especially from the speeches of statesmen from ancient and modern republics, the course requires the students to craft and deliver speeches of their own. In doing so, they practice the arts of memory and delivery. As they encounter the speeches of statesmen who turn the course of critical events either within their countries or in the world, they also necessarily reflect upon the close tie between rhetoric and the preservation of political liberty. Pericles, Cicero, Lincoln, Shakespeare's Henry V, Churchill, and Washington powerfully used their words to stir their countrymen to improbable victories. A major emphasis of the course is the tradition of rhetoric in the American republic.

TRV 302—The Junior Author Project (3 credits)

The goal of Trivium 302 is fourfold: 1) to enable students to put all their trivial skills together (arguing, analyzing, writing with clarity and beauty, speaking with persuasive power); 2) to prepare students for the senior thesis (Trivium 401); 3) to inspire and guide students, generally, in developing a habit of thought which is dialectical, creative, and synthetic; and, more particularly, in formulating projects which draw on the full range of the curriculum to answer questions of

perennial importance; and 4) to come to appreciate how various disciplinary modes of thinking enable us to appreciate a great author. Within the first classes, students are guided in selecting an author from the curriculum (or one who would be worthy of inclusion) and developing a list of works of philosophical, critical, and historical importance with which they enter into conversation over their author over the course of the semester. The semester ends with a “student conference,” in which students deliver papers, providing a panoramic description of their author, introducing their colleagues to his life, thought, development, important themes, historical background, and contemporary relevance.

The texts used throughout the Trivium sequence either offer instruction in the arts or serve as models for the students’ imitation, or both. A particular book may be used across multiple semesters.

Plato	<i>Gorgias, Phaedrus, Ion</i> , and other dialogues
Aristotle	<i>Rhetoric, Poetics</i>
Fussell	<i>Poetic Meter and Poetic Form</i>
Crider	<i>The Office of Assertion</i>
	Selected great essays, poems, and speeches by authors such as Homer, Herodotus, Thucydides, J. Pieper, C.S. Lewis, J. Swift, Shakespeare, Thomas More, etc.

TRV 401–402 Thesis and Oration I & II (3 credits)

As the culminating effort in which to demonstrate mastery of the verbal operations of reading, writing, listening, and speaking, as well as the art of reasoning, each student at Wyoming Catholic College researches and writes a senior thesis on a significant topic of his or her own choice. The student delivers, without a manuscript, an oration on the same topic in front of a public audience, followed by a question and answer period.

In contrast to the previous three years of the Trivium, where a classroom of students meets with a professor for exercises and coaching in grammar, logic, and rhetoric, the last year is characterized by individual meetings with the thesis adviser. Both the thesis and the oration are expected to show the characteristic signs of leisurely study: depth and breadth of relevant knowledge, careful and nuanced consideration of ideas, argumentative rigor, confident organization, and a rhetorically effective style.

The thesis and oration are together classified as TRV 401–402; each semester receives a grade, two credits for the former and one for the latter. In and of themselves, preparing the thesis and delivering the oration hold as much weight in the curriculum as a regular three-credit course.

TRV 401

In the senior thesis, the student frames a question of the sort that the texts in the curriculum themselves frame, and, in dialogue with one or more such texts and under the direction of a professor, the student refines, explores, and

answers the question. The student's answer is not intended to be definitive and exhaustive, but neither can it be superficial or simply the repetition of authority. The ability to carry out such an intensive investigation and to account for and defend its conclusions is an important aim of the College's overall program. A successful senior thesis and oration may be seen as a formal and public display that the student has attained such ability in his own right.

TRV 402

The senior oration is a public lecture of 30 minutes (neither significantly more nor appreciably less), followed by a question and answer period of no more than 30 minutes. Held within the first month of the last semester, the oration is always to be based upon the senior thesis, although it can look to one or another aspect of the thesis topic and need not cover exactly the same ground or utilize exactly the same research. It must be clearly and logically organized, make use of appropriate rhetorical tropes, manifest the speaker's familiarity with the topic, and exhibit sound judgment. In general, the student should aim to implement what he has learned in TRV 202 and 302.

LATIN CURRICULUM

Latin is the foreign language taught at Wyoming Catholic College because it is the historical language of the culture of the West and the universal language of the Roman Catholic Church. The WCC Latin Program's objective is to bring students to basic practical competence in Latin through a two-year cycle of required coursework in the freshman and sophomore years. Juniors and seniors maintain and develop their ability in the language by participating in Latin reading groups. Our students have found the skills they gain have tangible benefits across the curriculum, enriching their Theology, Philosophy, Humanities, Science, and even Mathematics coursework.

Pope Benedict XVI encouraged the study and use of Latin because of the close connection between it and the "understanding of the Church's treasures," that is, the appreciation of the cultural and liturgical inheritance that is the birthright of every Catholic Christian. Saint John XXIII stated on the eve of Vatican II:

Of its very nature Latin is most suitable for promoting every form of culture among peoples.... Nor must we overlook the characteristic nobility of Latin's formal structure. Its concise, varied and harmonious style, full of majesty and dignity, makes for singular clarity and impressiveness of expression.... There can be no doubt as to the formative and educational value either of the language of the Romans or of great literature generally. It is a most effective training for the pliant minds of youth. It exercises, matures, and perfects the principal faculties of mind and spirit. It sharpens the wits and gives keenness of judgment. It helps the young mind to grasp things accurately and develop a true sense of values. It is also a means for teaching highly intelligent thought and speech. (Apostolic Constitution *Veterum Sapientia*, 1962)

In addition to these benefits, it is well known that Latin is the key to learning many other languages, especially the Romance languages (Spanish, French, Portuguese, Italian, etc.), and is a gateway to a deeper understanding of English. As the reasons for learning Latin are many, so, too, are the rewards.

Latin instructors at the College use an array of methodologies borrowed from the most effective practices used by teachers of modern languages. They aim to bring their students to the same levels of proficiency, after two years of study, that students of modern languages at other institutions typically attain in the same period of time. As a matter of fundamental philosophy, our Latin instructors base their instruction on the imitation of nature: specifically, the recreation in the classroom of the learning processes by which every human being acquires his native tongue. Noteworthy proponents of this approach in the past include renowned British classicist W. H. D. Rouse and Danish educator Hans H. Ørberg, who authored the celebrated *LINGVA LATINA PER SE ILLUSTRATA* textbook series. Instruction delivered in this spirit promotes language acquisition in its fullest sense. It entails not only learning to read Latin but also learning to write and speak it as well, since, in most cases, it is only when a student has acquired sufficient mastery of a language to express himself in it that it becomes a permanent, indelible part of his memory.

In the Latin classroom, vocabulary and grammar are introduced in Latin sentences accompanied by illustrations or physical actions in a manner that makes new words immediately comprehensible. The direct linkage thus created between new words and visible images cuts out the distracting “middle man” of the student’s customary language and creates new associations between unfamiliar words and familiar objects. The method of grappling with written Latin by memorizing paradigms, outlining sentences, etc.—an approach which beginning-level students often find tedious or confusing—is replaced by the reading of short sentences and simple stories that presume no previous knowledge of the subject. Over time, these readings give students an “ear” for the sound of the language as a living vehicle of communication.

Our faculty know from personal experience that learning Latin in Latin, through observation and context, gives students self-confidence, stimulates their concentration, sharpens their faculties of observation and reasoning, and helps them move, step by step, towards the ultimate object of all Latin teaching: true understanding of the language, whether through the ears or off the page, with immediacy, appreciation, and joy.

By persevering in the Latin curriculum, students will:

1. Come to love the Latin language and to desire to progress in it further.
2. Learn in general how to learn a language.
3. Acquire over the course of two years, the main grammatical principles of Latin and internalize enough vocabulary to converse and learn in the Latin language.

4. By using Latin inside and outside of the classroom, gain an instinctive connection with past centuries of the western tradition in which Latin was the language of academic and political exchange.
5. By acquiring a non-vernacular language, increase their sense of citizenship in a society that goes beyond their own nation even in the present time, namely Western Civilization, and, if they are Catholic, the Catholic Church.
6. Be prepared, on completion of the two-year Latin program, to read portions of authentic Latin works in the original language, and to check English translations of more difficult documents against the original language.

COURSES

LAT 101–102 Elementary Latin I & II (3 credits each)

By the end of these two courses, students will read Latin school texts of medium difficulty, understand basic Latin grammar, demonstrate command of a fundamental practical vocabulary, and be able to speak and write elementary Latin with some facility.

LAT 201–202 Intermediate Latin I & II (3 credits each)

These two courses build on the foundation started in first year Latin. Students augment their basic vocabulary, strengthen their memory through self-expression in spoken and written Latin, and advance to more difficult texts.

LAT 301–402 Latin Reading (1 credit each)

Students continue their study of Latin through the directed reading of an influential Latin text. Each semester, students are free to choose from several groups, covering various authors, genres, and periods. Students must complete two directed readings in their upperclass years, but are welcome to participate in more. At least one of these classes must take place during the junior year.

EXPERIENTIAL LEADERSHIP CURRICULUM

Plato called the first step in the long journey of liberal education the poetic mode of education. This manner of educating is ordered primarily to cultivating the powers of sensation—the external senses as well as the internal ones (imagination, memory, emotions, etc.)—through the *direct* experience of reality, which means through gymnastics. The term “gymnastic” is from the Greek *gymnos*, meaning “naked.” Gymnastics, broadly speaking, is the naked or direct experience of reality. Gymnastics is commonly also understood to embrace the athletic arts or skills; hence the word “gymnasium.” The Greeks, who invented the gymnasium, celebrated physical perfection in the Olympic Games and in such literary masterpieces as *The Odyssey* and *The Aeneid* and the Pindaric odes. Gymnastics also includes more refined activities such as stargazing and dancing. Stargazing—distinguishing the constellations and learning their stories—disciplines the eyes and the imaginative power by providing, as St. Thomas says, “an ability to picture material things in their absence.” Dancing educates the ear and body, ordering them to melodious rhythms.

In the modern world, such direct experience of nature is in danger of eclipse. Men in even the largest cities of antiquity were more in contact with nature than the typical suburban dweller of today. As Joseph Cardinal Ratzinger argued in *Principles of Catholic Theology*, “Faith has the added task—in a time when creation has been forgotten, in which we live, to a large extent, in a secondary world of the self-made—of putting man once again in the way of creation in order to let him see it again and thus learn to know himself.”

In order to preserve or even recover this aspect of true liberal education, Wyoming Catholic College seeks to immerse students in the beauty and grandeur of “God’s first book,” the natural world. Direct contact with God’s creation inspires wonder, the root of true learning, and strengthens the imagination and the senses in a way that purely man-made environments cannot. At the same time, the dangers and discomforts imposed by the wilderness require students to develop all of the cardinal virtues: prudence, for the sake of organization, preparedness, and safety; temperance, to work with limited supplies and unexpected situations; fortitude, to overcome adversity; and justice, to treat group members with consideration and fairness.

All of this formation is needed for the sake of “leadership,” a term that gathers under one name all the practical virtues of the liberally educated man. The wilderness expedition in particular serves to teach leadership, because the small

group far from civilization offers a microcosm of society like to that imagined by Plato at the beginning of his *Republic*. The need to balance individual and common goods, often masked in cities, emerges clearly; the value of true leadership and of thoughtful following becomes transparent; lastly, the supreme importance of human virtue for the good of society stands forth in bold relief.

The Experiential Leadership Curriculum is therefore necessary both to students' academic pursuits and to their success after graduation. It grounds reasoning in wonder and strengthens the imagination for reading the great poets, while at the same time it cultivates the virtues necessary to succeed in the classroom and beyond.

OUTDOOR LEADERSHIP PROGRAM

Wyoming Catholic College's Outdoor Leadership Program (OLP) consists of two components. One component is called the Outdoor Adventure Program (OAP) which involves outdoor trips and experiences that are simply for leisure and recreation. This includes short afternoon trips and weekend trips throughout the academic year. OAP provides students a break from studies and a great way to get outside to socialize and exercise in and around Lander. Examples include: rock climbing, caving, mountain biking, rappelling, horseback riding, hiking, canoeing, singing around a campfire and stargazing, overnight backpacking, and more. These trips are completely optional, not graded, and purely for fun and relaxation. The second component is called the Experiential Leadership Program (ELP), which pertains to the academic curriculum. These outdoor trips and experiences are connected to academic classes, they are graded, and students' receive course credit. The following information covers the ELP.

EXPERIENTIAL LEADERSHIP PROGRAM

To ensure that students have opportunities to grow in their knowledge of creation and their constant development of leadership skills, the College's curriculum requires an extensive program for every student during all four years. Every freshman is required to do an extensive program starting with a 21-day backpacking trip and every sophomore, junior and senior is required to take a 1-credit course each semester which includes a weeklong trip (ultimately two weeklong trips per year which can be done any of the five opportunities throughout the school year). These Outdoor Weeks are scheduled five times each year and seasonally spaced: in August prior to matriculation, during Fall Break, in January prior to the Spring semester, during Spring Break and in May immediately following commencement. During an Outdoor Week, which runs from Saturday through Saturday, there are no academic classes and no large papers or projects assigned. This pause in the ordinary schedule permits students to immerse themselves completely in the outdoor experience, allowing them to take full advantage of all the learning that occurs in the wilderness setting. While

all sophomores, juniors, and seniors must participate in a minimum of two of the five weeks but can do more if desired, freshmen are strongly encouraged to participate in at least one such week over and above their Freshman Leadership Program. In all, each student will take a total of 12 credits throughout the 4 year curriculum, these courses are graded A-F and are part of the overall GPA.

By persevering in the Experiential Leadership Curriculum, students will:

1. Grow in humility and wonder through immersion in nature, God's "first book."
2. Strengthen their imagination and senses through extended contact with natural realities.
3. Learn by experience the importance of a balanced life of mind, body, and spirit.
4. Better grasp community and the common good through the experience of small, self-sufficient communities working in isolated and sometimes difficult situations.
5. Grow in the virtues necessary for both leading and following in the manner proper to a free human being, including teamwork, respect for others, commitment to group decisions, communication, self-awareness, tolerance for adversity and uncertainty, judgment and risk management.
6. See how what is learned in the Outdoor Leadership Program transfers to the classroom, campus life, and life after graduation.
7. Through extended physical activities, develop skills, such as coordination, balance, and practical initiative.

FRESHMEN CURRICULUM

ELP 101 (3 credits)

The summer portion of the Freshman Leadership Program is conducted prior to the commencement of academic classes, and is required for all Wyoming Catholic College freshmen. It consists of a two and a half day Wilderness First Aid Course provided by SOLO (Stonehearth Open Learning Opportunities), and a 21-day backpacking expedition. The classroom for our wilderness course is the rugged, glacier-carved Rocky Mountains here in Wyoming, renowned for its remote wilderness setting, glistening lakes, stunning vistas, and abundance of flora and fauna. In this awe-inspiring environment, students learn how to read maps, navigate routes on and off trail, live for three weeks with nothing but what is carried on their back, safely cross rivers, fly fish, cook meals on a portable stove, and most importantly, how to practice virtues and develop leadership skills that will last a lifetime. Students will bond with their classmates as they team up to meet and surmount the real challenges presented by wilderness travel. This trip sets up the freshmen well for their first semester at WCC by providing various challenges as well as creating a strong community with the people they will be living with and learning with once they return back to campus life.

ELP 102 (1 credit)

The winter portion, which takes place one week prior to the Spring semester, lasts seven days and focuses on winter camping and traveling skills. Students have the opportunity to build upon the skills they learned in August and continue to develop additional skills for traveling and surviving in the winter wilderness setting, a beautiful and demanding environment. Similar to the August trip, students will not only learn a variety of technical skills but will continue to practice leadership skills and develop character through this challenging experience. With proper training and equipment, students will learn to thrive in such stark conditions.

Freshmen are evaluated during both the August trip and the January trip and are given a grade based on their performance, leadership, and more. Successful completion of both portions of the Freshman Leadership Program is a requirement for graduation from the College. In addition, students who excel during these two trips will be recommended to become future leaders for the Outdoor Leadership Program.

EQS 102 Horsemanship (2 credits)

Wyoming Catholic College considers the Horsemanship Program an important part of its curriculum, one that provides occasion for the students to get to know themselves better. Socrates reminds us that part of wisdom is to “know thyself.” Paradoxically, this advice is best kept not by looking within for some elusive “self,” but by interacting in lively ways with God’s creation. The horse, one of God’s noblest creatures, is a living, conscious being operating at a high level of animal intelligence; it has a character, and emotions, “a mind of its own”; it is not a mere machine, with “push button” results. The rider needs to establish and maintain a gentle balance with his equine partner. Together, horse and rider can achieve outstanding results with time, patience, guidance, communication, humility, and respect. Moreover, horses have been inextricably bound up with Western civilization for thousands of years and, closer to home, have played a prominent role in Wyoming’s history: they brought people here, served their evolving agricultural needs, and became a force in forming the heritage of the American West.

Horsemanship is the ability of a person to establish a working relationship with horses, predict their behavior and even to understand how a horse “thinks.” It is a partnership based on tasks, fitness, and an understanding of each other’s needs. Horses are large and powerful animals, but they can also be timid and easily frightened. With the right approach, horses can be kind and obedient creatures who desire human interaction. This semester teaches the fundamentals of horsemanship, providing fundamental knowledge in horse anatomy and function, conformation, horsemanship practices, stabling, training, and health care, along with much practice in riding and Western tack. Cues, aids, gaits, and maneuvers are thoroughly explained, demonstrated, and practiced. Individual help is given in areas needed. Texts for the course are chosen by the instructor.

SOPHOMORE, JUNIOR AND SENIOR CURRICULUM

ELP 201, 202, 301, 302, 401, 402 (1 credit each)

During the Fall and Spring semesters during the sophomore, junior and senior years each student takes a 1 credit course. This course has two elements that involve the practical and theoretical components. Seven classes are devoted to the Outdoor Weeks and six classes each semester are devoted to in-class leadership curriculum. While the outdoors provides hands-on experience in leadership, the classroom provides leadership theory, models and more.

Outdoor Weeks Component Description

Every year each student (sophomore, junior and senior) is required to plan, prepare, participate, and debrief in a minimum of 2 Outdoor Week Trips. The 2 Outdoor Week trips fulfill the requirement of 1 weeklong trip per semester in conjunction with the 1 credit course each semester. The time spent preparing for and participating on the weeklong trip replaces classroom time for the overall 1 credit course. In order to accommodate students' varying schedules, students can choose any 2 of the 5 offered trip times throughout the year which include: : in August prior to matriculation, during Fall Break, in January prior to the Spring semester, during Spring Break and in May immediately following commencement. Each trip will fulfill the weeklong trip required for each semester and the grade received for the work put into the trip will contribute to the overall grade for the semester long ELP course.

Classroom Component Description

The classroom component will further develop leadership by analyzing various leadership theories and models. These leadership fundamentals are then utilized and practiced during the various leadership opportunities each student has at WCC throughout their daily life, work-study positions, the weeklong trips, and any other leadership opportunity in and out of school. The classroom component is designed to enhance the hands-on experience each student receives during the Outdoor Weeks and more. While hands-on experience is imperative to learn and practice leadership skills, understanding leadership fundamentals and theories will further improve every student's leadership. While the Outdoor Weeks value has a lot to do with each student's personal willingness to improve and learn from successes and mistakes, "the more you put into it the more you will get out of it", the classroom component does provide a baseline of information that is taught to every student. Knowing these theories and models will provide a huge advantage in the future when applying for jobs and stepping up in leadership roles down the road. In addition, the classroom component of the ELP also focuses on career development. For example, students will have the opportunity to investigate what career path they may want to pursue, develop a resume, explore internship opportunities, graduate school, job searching, practice interviewing face to face, and more.

ADDITIONAL OPPORTUNITIES

Wilderness First Responder (WFR) Training

Students who want to become outdoor leaders for the Outdoor Leadership Program have an opportunity prior to the Fall semester to take a 9-day extensive SOLO wilderness medicine course paid for by the college (typically \$600-\$700). Successful completion of this course results in a 3-year WFR certification. The WFR is the industry standard in wilderness medicine for any outdoor program and is ideal for any student who wants to work for a summer camp or any outdoor program during the summer or in the future or anyone who is interested in learning more about medicine and help the College's Outdoor Leadership Program.

Outdoor Leaders

The Outdoor Leadership Program at WCC is student led. Therefore, the college needs students to step up to the challenge to become outdoor leaders. This starts by taking the WFR and is followed up by studying the Outdoor Leader manual and taking 16 tests to prove one's knowledge of the information. These tests can be taken anytime throughout the semester during the student's discretionary time. Once the tests are complete the student is eligible to take the weeklong leader course which takes place right after graduation each year. After taking this course students are ready to lead trips. As students start to gain more and more experience they will have more responsibilities, starting with leading OAP weekend trips to being a head leader for a weeklong ELP trip. Beyond that, excellent student leaders can apply to be an instructor for the three-week Freshman Expedition. Students who are hired for this paid position take a 2 week instructor course and upon certification are eligible to co-lead the three-week Freshman Expedition during their senior year. Whether a student want to simply get their WFR or go all the way and become an instructor, the college Outdoor Leadership Program needs student leaders and everyone how helps at any level is greatly appreciated.

Weekend Recreation

Beyond the Experiential Leadership Curriculum, students have other non-academic opportunities throughout the year. With the training received in the freshman year, our students have the ability to engage in many informal outdoor adventures during free-time in the afternoons and the weekends. The OAP activities include such things as hiking, fishing, backpacking, rock climbing, peak ascents, mountain biking, caving, whitewater rafting, cross-country and resort skiing, horseback riding, running, an adventure race, and more. In order to encourage student participation in such activities, the College has an Equipment Center with the proper outdoor and safety equipment available for free, along with computer technology for plotting routes and printing maps.

ADMISSIONS

In light of our mission to educate the whole person, we evaluate applicants as whole persons, without undue emphasis on any particular component of the application or on the applicant's academic credentials only. We instead give special attention to the overall fit between the applicant and the College as well as to the aptitude and character traits demonstrating the likelihood of success with our challenging course of study.

Items Required for Application: The online application form is available on our website or may be requested from the Admissions Office by email or telephone. A complete application consists of the following parts:

1. The application form and processing fee: Full instructions for completing the form and all related application components are found on the form itself. The processing fee of \$50 is waived for any completed application received by December 1st. This form requires a self-evaluation of fitness for the three-week Freshman Expedition and contact information for two references.

2. One three-page essay: The essay topic may be chosen from the questions listed on our application webpage. Applicants should give great care to completing, proofreading, and presenting their essays. The essays must be the applicant's own work, with minimal advice and suggestions from others. The Admissions Office may request additional writing samples or may seek to evaluate the applicant's writing ability in other ways.

For those students who qualify for a Merit Scholarship, this entrance essay will be evaluated to determine their scholarship level.

3. Official transcript(s) of all schools attended: Official high school and college transcripts are issued by the school, with a seal and signature. For applicants registered with an established homeschool curriculum, an official transcript from the curriculum provider is adequate. Other homeschooled applicants are to submit information, signed by a parent, about the curricular materials they used, listing the subjects, major texts, and grades.

4. Standardized test scores: Wyoming Catholic College requires SAT, ACT, or CLT score reports sent from the testing companies directly to the Admissions Office; please visit www.collegeboard.com, www.act.org, or www.cltexam.com to

request scores. Our code numbers are 4748 for the SAT and 5001 for the ACT. *Applicants who take the ACT must take the ACT Writing Test.*

Score requirements: Although we do not have a set minimum requirement for SAT, ACT, or CLT scores, these scores are an important part of the overall evaluation. In our experience, scores above the 50% percentile in each subject area are associated with an ability to succeed academically. The average composite score for the Class of 2020 was 1756 for the SAT (previous version) and 28 for the ACT.

Interview: When all the items listed above have been submitted, the Admissions Office will contact the applicant to arrange a telephone or Skype interview.

English Proficiency: The language of study is English. If English is a second language for the applicant, the Test of English as a Foreign Language (TOEFL) must be passed.

Educational Prerequisites: Wyoming Catholic College admits as regular students only individuals who have a high school diploma or its recognized equivalent, or are beyond the age of compulsory education in Wyoming.

Due to the wide variety of schools and homeschooling curricula, Wyoming Catholic College makes no specific course recommendations. Nevertheless, the College expects incoming freshmen to have studied a standard curriculum of preparatory studies, including literature, grammar, American and European history, natural sciences (including biology and chemistry), a foreign language, and mathematics up to algebra 2/trigonometry. (While calculus and physics are very helpful, they are not a necessity.) Applicants should demonstrate an ability to write well, as the College puts a premium on excellent writing.

Commitment of Enrollment: After the applicant is accepted into the College, he or she reserves a place in the freshman class by signing and submitting a Commitment of Enrollment accompanied by a \$500 deposit, which will be credited against tuition and fees.

Vaccination Records or Waivers: During the enrollment process, the applicant shall submit doctor-signed immunization records showing vaccination dates for measles, mumps, and rubella after 15 months of age, or serologic evidence of immunity. The College also requires a tetanus shot within 10 years prior to the start date of the summer expedition. Applicants with medical or ethical objections to vaccinations may request waiver forms from the Registrar.

Physical Examination Form: The Physical Examination Form is to be completed and signed by a doctor, physician's assistant, or nurse practitioner after examining the applicant. This form must be completed and submitted no more than 8 months,

and no less than 2 months, before the August start-date of the summer portion of the three-week Freshman Expedition described in the “Outdoors Curriculum” section of the *Catalog*. An applicant who receives medical clearance for the summer expedition will be considered likewise fit for the other outdoor components of the curriculum. An applicant who is denied medical clearance cannot be enrolled into the College.

The Physical Examination Form will be emailed to the applicant by the Registrar after receiving the applicant’s Commitment of Enrollment.

Modified Rolling Admissions: Wyoming Catholic College employs a modified rolling admissions policy. The Admissions Committee meets regularly to consider and render decisions on all applications that have been received since the previous meeting; qualified applicants will be accepted in the order in which their applications were received and completed. This being so, the sooner an application is submitted, the better the chances are of enrollment. The applicant will be notified immediately upon acceptance by the Admissions Committee. Applications are evaluated beginning September 1 of the year prior to the year of intended enrollment.

Early Decision Option: High school juniors who are intent upon attending the College may submit an early application by June 1 of the summer between junior and senior year to participate in the Early Decision Option. This requires a full application, excepting standardized test scores, and attendance at the PEAK Summer Program during the same summer. Pending notification of admission, students are expected to submit their Commitment of Enrollment before September 15 of their senior year.

The benefits include (1) one application for both PEAK and for admission, (2) early notification of admission, (3) waived standardized test scores (pending excellent performance at the summer program), and (4) early invitations to the Founders’ Scholarship Competition.

Campus Residency: Wyoming Catholic College students are required to live in appointed residence halls. All residence halls are single-sex, and no inter-visitation is allowed. The College employs a full-time Director of Student Life as well as a prefect system.

Transfer Students: Wyoming Catholic College has a fully integrated curriculum in which each course builds upon the foundation of previous courses and is cross-integrated with other courses taken in the same semester and year. Due to this fact, anyone who attends the College enters as a freshman, regardless of previous college experience.

Nondiscrimination Policy: Although Wyoming Catholic College is a Catholic college, no one is excluded on the basis of religion. The College also does not discriminate on the basis of race, color, sex, national or ethnic origin, physical handicap, or age in the administration of its educational policies, admissions policies, scholarship or financial aid programs, intramural athletics, or any other school-administered programs.

VISITS TO CAMPUS

Prospective students and their parents are encouraged to visit the campus while classes are in session, although visits during the summer are also welcomed. If possible, visits should be arranged at least two weeks in advance. To schedule a personal meeting or to obtain advice about hotel accommodations and other details, please call the Office of Admissions at the Main Office (307-332-2930) or send an email to admissions@wyomingcatholic.org.

ADMISSIONS

The direct costs for a student to attend Wyoming Catholic College are as follows:

	2016-2017
Tuition	\$21,500
Room and Board	\$8,000
Books, Materials and Activities Fee	\$800
TOTAL	\$30,300

Books, Materials and Activities Fee: This required fee includes all course books, reading packets, and handouts distributed to the students each academic year. The activities fee includes use of a nearby gym, swimming pool, laundry facilities and other services.

Student Health Insurance: Medical insurance for the three-week Freshman Expedition, must be held or obtained by each student prior to his or her arrival at the College. For students in need of insurance, we recommend visiting www.ehealthinsurance.com to choose the medical insurance plan that best meets their needs.

Outdoor Equipment: At the inception of the student's freshman year, it is necessary to purchase or rent personal equipment and clothing required for the three-week Freshman Expedition that takes place in August. While the actual cost varies from student to student, the average cost per student is approximately \$500 for gear purchase and \$300 for gear rental. A detailed equipment list is mailed to committed students, accompanied by instructions on how, where, and when the gear may be obtained. Please note that students, upon their arrival at the College, may conveniently obtain equipment and clothing at the NOLS Rocky Mountain outfittering shop in Lander. If students purchase equipment and clothing prior to arrival, all items must meet WCC approval prior to departing on the August expedition.

Estimated additional expenses are as follows:

Spending Money: Students will, of course, need some additional funds to cover such personal expenses as stamps, snacks, laundry soap, toiletries, entertainment, fishing licenses, optional outdoor trips, etc.

Transportation: Most financial aid recipients who are from out of state travel home only twice per academic year, at the Christmas break and at the end of the school year. Travel expenses will vary based on the mode of travel and the proximity of the student's home to the College. Limited shuttle service to the Riverton and Denver airports is provided by the College for a reasonable fee. For more information, please call the Main Office (307-332-2930) or send an email to shuttle@wyomingcatholic.org.

Refunds: If a student ceases attending the College before the seventh week of classes in a semester has passed, tuition, room, and board will be prorated on a per diem basis, and refunds of parent and student payments will be determined accordingly. Such refunds are made only if the student leaves before the end of the seventh week. After that point, no funds will be returned.

FINANCING YOUR EDUCATION

Wyoming Catholic College is committed to making the unique education it offers available to qualified students regardless of their financial need. The College endeavors to meet the needs of each student through its program of financial aid, which includes a work-study program and need-based scholarships.

In order for the College to award financial aid truly representative of the needs of the student and his or her family, financial information regarding the family's income and expenses must be submitted. Each student seeking financial aid must submit the *Application for Financial Aid*, obtainable from the Admissions Office or from the College website, and include copies of the current year's federal income tax return.

PAYMENT OF TUITION AND COSTS

Before the College can extend an offer of financial aid, the student and his or her family must cover, out of the following sources, as much of the total cost of the student's education as possible.

Source 1. Outside Scholarships

As a prerequisite to receiving financial aid from the College, each student must apply for a minimum of two outside scholarships. Scholarships are often awarded by local service clubs (such as the Knights of Columbus, Council of Catholic Women, and Rotary), corporations, private organizations, religious organizations, high schools, unions, and the military. Prospective and current students are encouraged to seek help from high school guidance counselors, browse the internet (www.scholarshiphelp.org is a good place to start), and visit the library to begin their search for available scholarships. The College encourages its students to apply for as many sources of outside aid as possible.

For all students that receive financial aid from the College, these outside scholarships will be shared pro rata between the College and the student based on his or her financial aid package received from the College. If, for example, a student/parent is paying 60% of tuition and costs, 60% of the outside scholarship will go towards reducing the student/parent payments or loans. Students are responsible for notifying the Financial Aid Office when outside aid is received, even if they have already been notified of their financial aid package from the College.

Source 2. Wyoming Catholic College Scholarships

The College offers many scholarship opportunities for students. These include the Benedict XVI Fellowship, WCC Merit Scholarship, Founders' Scholarship, Native American Mentor-Student Partnership and the Christine Allen Memorial Scholarship. Specific details regarding each of these awards are provided in the Financial Aid section of the *Catalog*.

Source 3. Payments from Parents

A student's parents must contribute their maximum possible effort towards the cost of their child's collegiate education. Parents are encouraged to view educational expenses not only as part of their general obligation to provide for their children and prepare them adequately for their adult lives and vocations, but also as the material support of a spiritual work of mercy, and therefore as part of tithing and charitable giving. The College utilizes a standardized financial aid calculator to reach a final determination of the family's financial need based on analysis of the *Application for Financial Aid* and copy of the current year's federal income tax return.

Source 4. Payments from Student

To be eligible for financial aid, a student must contribute a minimum of \$3,000 each year from summer employment towards tuition, room, and board. If students have available savings, they are expected to contribute from there as well.

Source 5. Student and Parent Loan Program

The College offers interest-deferred loans to students and parents based upon the student's calculated need established by the College. The current interest rate is five percent, and interest does not accrue until seven months after the student leaves the College. For most students, the maximum loan available for freshman is \$3,500, sophomores \$4,500, and junior and seniors \$5,500. The College believes that this practice of borrowing wisely and then repaying a modest debt promotes responsibility and builds the virtues of prudence and temperance. Parents are expected to borrow \$2,000 per year, an amount that is not increased even if more than one of their children are simultaneously enrolled at the College. Limited-time deferments are available for continuing full-time students, missionary work, and certain medical hardships. In addition, deferment is provided for those students who begin formation for the priesthood or religious life and the College offers loan forgiveness when those students take their final vows.

FINANCIAL AID

FELLOWSHIPS AND MERIT-BASED SCHOLARSHIPS

Benedict XVI Fellowship

Wyoming Catholic College offers the Benedict XVI Fellowship to incoming freshmen who have distinguished themselves through the overall excellence of their admissions applications. This fellowship, which defrays up to \$5,000 of the cost of tuition, room & board, and fees is awarded by the members of the Admissions Committee in recognition of conspicuous strengths such as musical talent, Latin ability, or community involvement. This grant for freshman year is not based on financial need.

Merit Scholarship

Wyoming Catholic College awards a number of scholarships to students based on academic merit. To qualify, the applicant must have (1) scores of at least 1185 on the SAT (based on its previous version), 25 on the ACT, or 79 on the CLT; and (2) a high school GPA of 3.25 or better. The Admissions Committee will determine scholarship amounts between eighth-tuition, quarter-tuition, and half-tuition amounts based upon the test score and excellence of the application essay.

Founders' Scholarship

The Founders' Scholarship is a full tuition scholarship awarded to a student who shows academic excellence, great work ethic, and strong communication skills. Competitors for this scholarship participate in a weekend competition at Wyoming Catholic College. The scholarship is renewable from year to year, provided the recipient maintains a minimum cumulative GPA of 3.00 and is in good standing with of the College.

During the 2015-16 academic year, Wyoming Catholic College awarded to 46% of its students over \$300,000 in fellowship and merit-based scholarships.

ENDOWED SCHOLARSHIPS

The Native American Mentor-Student Partnership at Wyoming Catholic College

As the result of a generous grant from the Bureau of Catholic Indian Missions, Wyoming Catholic College is pleased to offer a special scholarship program to qualified Native American students. The program enables the College to offer

need-based financial grants that may, in some cases, cover all costs of attendance, including tuition, room and board, and books. But it is more than just a scholarship program. Incoming Native American students are matched from their first days at Wyoming Catholic College with “student-mentors” from among the current student. Please contact the Financial Aid Office for additional details and application guidelines.

Christine Allen Memorial Scholarship

The Christine Allen Memorial Scholarship was established to remember and celebrate Christine’s extraordinary life as a student at the College. Her legacy continues by helping fellow Wyoming Catholic College students achieve the educational experience she so desired. This \$2,000 scholarship is available to all current Wyoming Catholic College students.

During the 2015-16 academic year, Wyoming Catholic College awarded approximately \$100,000 in endowed scholarships.

NEED-BASED FINANCIAL AID

After the above sources have been fully utilized, students are eligible for financial aid from the College, which comes in two forms: the work-study program and need-based scholarships. It is understood that the College will exercise its own judgment in determining the amount of assistance offered to a prospective student.

Work-Study Program

Work-study positions are available in areas such as food service, grounds keeping and maintenance, library, and administrative and faculty offices. The number of hours required of a student on work-study is ten hours per week for 30 weeks. For this work, a maximum of \$3,000 per year is credited against room and board. It is the student’s responsibility to work the required hours and meet the work-study amount credited as financial aid to the student.

Work-study wages are taxable income to the student. A W-2 form will be provided and the student may incur a tax liability at the end of the calendar year, depending on whether a student chooses to withhold federal taxes from their wages. This may result in a shortfall in work-study compensation.

A student who has accepted aid in the form of work-study agrees to accept the work assignment given and to abide by the work schedule assigned. The work that students are assigned does not interfere with class times.

A student’s failure to complete the weekly hours or to do the work adequately may result in disciplinary action, up to and including the loss of work-study financial aid. The student is responsible for repaying to the College any shortfall in the work-study credit amount provided in the financial package.

At the discretion of the Work-Study Committee, upperclassmen who meet established criteria are permitted to work off-campus in lieu of work-study positions on campus.

During the 2015-16 academic year, Wyoming Catholic College provided approximately \$300,000 in work-study assistance to 71% of the students.

Grants

If, after the above-mentioned payment sources and the work-study program have been taken into account, the student still needs additional resources to meet fully the cost of tuition, room, and board, the College will make every effort to award an outright grant that does not need to be repaid. Grant amounts for any student will be assessed yearly on the basis of the family's financial situation.

During the 2015-16 academic year, Wyoming Catholic College awarded to 63% of the students approximately \$1,000,000 in grants.

DONOR APPRECIATION

During the year, a student will be contacted by the Advancement Office and asked to write a letter of appreciation to the donor(s) who helped to make possible the financing of his or her education.

VETERAN'S EDUCATION

Wyoming Catholic College is an approved institution for the Post 9/11 GI Bill for veterans and eligible beneficiaries.

What is Covered

The Post 9/11 GI Bill provides financial assistance to cover tuition, room/board and books.

Tuition

At this time, the Veterans Administration (VA) allowance for private institutions covers the full amount of tuition at the College. This amount is paid directly to the College. If the student receives any scholarships that are payable towards tuition, those amounts will be deducted from the cost of overall tuition prior to submission to the VA for certification.

Room/Board

The VA provides a housing allowance to veterans and eligible beneficiaries. These funds are paid directly to the student who in turn pays the College for these costs. Any amounts paid by the VA over and above the cost of room/board may be kept by the student.

Book Stipend

The VA provides a book stipend which is currently \$1,000 per academic year. This amount is paid directly to the student who in turn pays the College for the cost of books. Any amount paid by the VA over and above the cost of books may be kept by the student.

Commitment of Attendance and Deposit

As a sign of their commitment to attend the College, all students are required to sign a commitment form and pay a deposit. Veteran students will have the option of applying the deposit to their costs of room/board or to have it refunded to them.

Refund of Veteran's Education Benefits

The refund policy for veteran beneficiaries will be as follows: (1) Tuition and room/board shall be prorated based upon the number of weeks of student attendance; (2) Costs of books and materials may be refunded in whole or in part depending on whether or not they are returned and are in serviceable condition; (3) If a student purchases outdoor equipment for the three-week Freshman Expedition, it may be repurchased by the College if it is in serviceable condition.

Satisfactory Academic Progress

In order to continue to receive veteran education benefits, student recipients must maintain the minimum academic standards as set forth by the College. Grade information will be provided to the VA to show that these standards are being met by the student.

HOW TO REQUEST FINANCIAL AID

Incoming Freshmen

Please read carefully, complete thoroughly, and return in a timely manner the *Application for Financial Aid*, along with the required attachments. Additional information may occasionally be required to clarify unusual circumstances.

Since financial aid is limited, it is highly recommended that these items be submitted as early as possible, but no later than April 15th or 30 days after acceptance, whichever is later.

Returning Students

Returning students receiving financial aid must submit annually an *Application for Continuation of Financial Aid*, along with the required attachments. These items must be submitted by April 15.

Notification of Aid

The College makes every effort to inform students of their financial aid within two weeks of receiving a complete application and tax returns. For returning students, notification of financial aid package will be communicated by June

1st of each year. In most situations, the sooner the College receives the student's completed forms, the sooner that student will receive notification.

PAYMENT PLANS

All student payments, including those from outside loans, are due by the respective student check-in dates for the fall and spring semester. Parent payments *from outside loans* are due on the same dates.

For the balance of cash payments from parents, one of the following payment plans may be selected:

Plan 1: Single-Payment Plan. Amount due by June 30. Discount may be offered and will be communicated at time of billing.

Plan 2: Two-Payment Plan. Payment amounts due by June 30 and December 31. Discount may be offered and will be communicated at time of billing.

Plan 3: Ten-Payment Plan. The total amount due is paid in ten equal monthly installments beginning on July 1. This payment plan requires a \$100 processing fee due with the first payment.

ACADEMIC POLICIES

The curriculum we offer at Wyoming Catholic College aims to create good habits of free and responsible men and women that will remain with them throughout their lives. Students should be motivated by a love of truth, and the academic regulations are intended to foster that underlying principle of academic conduct.

It is the student's responsibility to be familiar with and to comply with all academic regulations.

The Academic Dean is the normative head of academic life at the College, and all questions regarding academic matters should be referred to him or his delegates.

Degree Requirements

The WCC curriculum integrates the materials that constitute the major subjects of the liberal education in a way that illumines their meaning and shows their relevance to one another. As a consequence, all students in the program take the same courses in a predetermined order, and all are required to attend full-time.

Course Load

Successful completion of the entire set curriculum, consisting of 137 credits of coursework is required to graduate with a Bachelor of Arts degree in Liberal Arts. Three of the 139 credits consist of the Senior Thesis and Oration (TRV 401–402). A minimum cumulative grade point average (GPA) of 2.0 is also required.

Registration

Admitted freshmen are enrolled on the date when Wyoming Catholic College receives the student's Commitment of Attendance form and required deposit. Re-enrollment for returning students occurs when the College timely receives the annual Re-Commitment of Attendance form. Enrolled students are officially registered for the academic year when all required forms are completed and signed by the student and received by the Registrar. These forms include, but are not limited to, proof of health insurance, health information update, Registration form, Acknowledgement of Access to Educational Records, Acknowledgement and Assumption of Risk and photo release. In addition, students and parents must complete and sign the Payment Plan and Promissory Note and all WCC loan documents, if applicable. In addition, there must be no unresolved disciplinary or academic problems.

Academic Advising

Wyoming Catholic College has a set curriculum and course load for every student for all four years and thus needs no assigned advisors. The Academic Dean and the faculty are readily available to students for consultation and counsel about any difficulties they may be having. Additional tutoring in any subject can be arranged for students who request it; at times students may be required to seek tutoring. In general, it is the student’s responsibility to seek out help from professors, rather than waiting for it to be offered.

Don Rags

About mid-way through each semester, each freshman and sophomore student meets with his teachers as a group to receive positive and constructive comments about his academic performance. The Academic Dean may choose to meet with freshmen and/or sophomores to discuss various aspects of the intellectual life and of their academic progress. In place of Don Rags, juniors and seniors are expected to ask about their standing with their professors.

Practica

Wyoming Catholic College occasionally offers Practica in theology and sometimes other disciplines.

Grades & Honors

Although the College sees it as intrinsically more important that students acquire good habits than that they achieve high grades, grades are given to help record the student’s academic progress and to provide graduate and professional schools with the information they need to assess applications for admission.

Grading System

Wyoming Catholic College uses a 4.0 grading scale. Letter grades, including pluses and minuses, are awarded for courses; the grade of “A+” is not given. The chart below indicates numerical equivalents for letter grades, as well as a description of how the grades are to be understood.

GPA	LETTER	DESCRIPTION
4.0	A	Excels in fulfilling requirements or exceeds them
3.7	A-	
3.3	B+	
3.0	B	Fulfills requirements well
2.7	B-	
2.3	C+	
2.0	C	Adequately meets requirements

1.7	C-	
1.3	D+	
1.0	D	Barely meets requirements
.7	D-	
0	F	Fails to meet requirements
	P	Passes the requirements
	I	Incomplete
	W	Withdrew
	WP	Withdrew with a passing grade
	WF	Withdrew with a failing grade

A student's GPA for each semester, as well as the cumulative GPA, is recorded on a report card and on the student's transcript. At the end of each semester, grades are sent to each student and to his or her parents, according to the agreement signed by the student. If a student or the student's parents have any outstanding debts to the College, the student will not be allowed to re-register or to obtain a transcript.

Academic Honors

A student earning a semester GPA of 4.0 is placed on the President's List; 3.7 or higher is placed on the Dean's List; 3.5 or higher is placed on the Honors List.

Graduating with Honors

Students graduate with honors if they achieve the following cumulative GPAs: *cum laude* for a GPA of 3.5 or above; *magna cum laude* for a GPA of 3.7 or above; *summa cum laude* for a GPA of 3.85 or above.

STUDY AND CLASS PARTICIPATION

Class Preparation

Both the preparation of a text by careful reading, and its treatment in the classroom, are ordered to a deeper understanding of the truth. Students should allot as much time as necessary to prepare the assignments.

Class Attendance

Class attendance at Wyoming Catholic College is mandatory. At his own discretion, a professor may choose to accept work missed due to an absence. Each course syllabus specifies in detail the impact of absences on the grade for a given course.

Further, the College sees class attendance as an important component of community life at the College. Therefore, if a student misses more than two weeks of a given class for any reason, he or she will have to appear before the Disciplinary

Committee which will then determine whether any disciplinary action needs to be taken, including probation or dismissal from the College.

The Lecture Series is an essential part of the College curriculum, and attendance is mandatory. Students are required to sign the attendance sheet at each lecture.

Authority of Professors

A professor may exclude or suspend from class a student acting in a disruptive or unbecoming manner. If there are repeated violations or the incident is sufficiently serious the matter will be referred to the Disciplinary Committee for action, which could include expulsion.

PROBATION, DISMISSAL, AND INCOMPLETES

Academic Probation

The minimum cumulative GPA of 2.0 required to graduate is based on a judgment that a student who does not, to a certain determinate extent, grasp and retain the materials learned in class is not in fact successfully completing the College's integrated curriculum. Hence, a freshman, sophomore, or junior whose semester GPA falls below 2.0 will be put on academic probation for the following semester. If such a student fails to attain a semester GPA of 2.0 or higher for any semester in which he is on academic probation, he will be dismissed from the College. In order to be taken off academic probation, that student must raise his cumulative GPA to at least 2.0. If the student does not raise his cumulative GPA to at least 2.0 within two consecutive semesters, he will be dismissed from the College. For seniors, a minimum semester GPA of 2.0 for each semester of senior year is required in order to graduate from the program.

Academic Failure

Normally, a student who receives an F in any course will not be permitted to continue at the College. In certain cases, the Academic Dean in consultation with the faculty may allow a student to make up the F by retaking tests or completing missing work in order to obtain a passing grade. The instructor of the course, in consultation with the Dean, will determine the exact nature of the assignments or tests needed to fulfill the requirements for a passing grade. Students in this situation must complete all assigned work either during the Christmas holidays or during the first month of the summer vacation. A student who fails multiple courses will not be given an opportunity to make up the grades.

Appealing Grades

Students who receive a letter grade of C- or below for a course have the option of formally appealing their grade, if they have discussed the grade with the course instructor and not come to a satisfactory resolution. The student must contact the Academic Dean within three weeks of the reception of the grade. The student appealing the grade has the responsibility of providing evidence to support the claim that the grade should be higher. The appeal, with evidence, will be considered first by the Academic Dean, and, if he judges it necessary, by the Academic Council.

Incompletes

If a student is unable to complete the requirements for a required academic course by the end of the semester, he may ask the instructor for an incomplete, and the instructor, in consultation with the Academic Dean, may at his discretion grant the student one month from the last day of the semester to complete the work. Incompletes are granted only in dire circumstances, such as a serious illness. If after one month the coursework is still incomplete, a student will receive the grade he has earned for that course.

Withdrawal

A student may voluntarily withdraw from the College before completing seven weeks' worth of classes. The transcript will show "W" for each of that semester's courses. A student who thus withdraws is entitled to receive a refund of payments already made toward the remainder of tuition, room, and board. If a student withdraws after the seventh week of classes but before completing the twelfth week, he will receive "WP" or "WF" on the transcript for each of that semester's courses, indicating whether he had a passing or a failing grade at the point at which he withdrew. A student who has withdrawn after the seventh week will not be entitled to a refund for tuition, room, board or fees for that semester. A student is not permitted to withdraw after the twelfth week of class. Should he leave the college at that point, his transcript will show an F for each of that semester's courses.

Reapplying to the College

A student who fails to meet the terms of academic probation, suffers dismissal due to one or more failing grades, or withdraws may inquire about reapplying to WCC. Such cases will be reviewed by the Director of Admissions, the Academic Dean, and the Director of Student Life. A student who left because of a failure to meet academic probation would reapply to begin anew the semester in which he first earned probation; thus, two full semesters would need to be repeated.

Repeating a Semester

When a student repeats a semester for any reason, all the new grades, even if lower than before, will replace the previous grades on transcripts and for the purposes of GPA calculation. Students who are permitted to repeat a year are required to take all classes, including the ELP trips. A student mentor will be provided to help the student with his schoolwork in his repeating year.

Intellectual Honesty

At the center of WCC's mission is the formation of the mind. Teachers use written and other assignments to discover whether a student understands a certain truth or possesses certain intellectual habits, and then they teach based on what they have discovered. Any attempt to defeat these assignments by deceiving the teacher about what work the student has done for himself constitutes intellectual dishonesty. Because it is an offense against truth itself, and because it attempts to

prevent teachers from teaching, such dishonesty is a direct attack on the common good of the College: as far as it lies in his power, the student who cheats or plagiarizes opposes the reason for WCC's existence. Moreover, any commendations or benefits the cheater or plagiarist gains through his grades are effectively stolen, and in some cases stolen from others who should rightfully have received them.

Teachers expect that students will help each other in the initial brainstorming stage of an assignment, and so they are not deceived when students help each other in this way. Students also commonly ask one another to read an essay draft to check for clarity and persuasiveness. However, it is wrong to do any of the following:

- To submit an essay written in whole or in part by another student as if it were your own, or to copy another student's homework and submit the work as if it were the product of your own labor;
- To use or download an essay from the internet, then quote or paraphrase from it, in whole or in part, without acknowledging the original source;
- To restate verbatim or paraphrase another author's work or to reproduce the substance of an author's argument without acknowledging the source;
- To take work originally done for one instructor's assignment and resubmit it to another teacher;
- To cheat on tests or quizzes through the use of hidden notes, viewing another student's paper, revealing or receiving test or quiz answers through verbal or textual communication, sign language, or other means of storing and communicating information.

Any action of this sort will result in failure of the assignment. Repeated acts of intellectual dishonesty will normally entail expulsion from Wyoming Catholic College.

Academic Freedom

St. John Paul II's Apostolic Constitution *Ex corde Ecclesiae* (1990), which established binding norms for Catholic institutions of higher education, speaks of academic freedom in the following way:

Catholic teaching and discipline are to influence all university activities, while the freedom of conscience of each person is to be fully respected. Any official action or commitment of the University is to be in accord with its Catholic identity. (Part II, Art. 2)

Freedom in research and teaching is recognized and respected according to the principles and methods of each individual discipline, so long as the rights of the individual and of the community are preserved within the confines of the truth and the common good. (General Norms, Art. II, §5)

At Wyoming Catholic College, students enjoy to the full the same rights of intellectual inquiry, and bear the same responsibilities of conscience, as do their teachers. In every way the College's curriculum and campus life are ordered to the flourishing of its members in the love of truth and the living out of authentic freedom.

RECORDS

Records Policy

The academic transcript and its contents as required by law, as well as alumni contact information, will be maintained upon a student's departure in good standing. Dismissal records are also maintained. All other files will be destroyed five years after the date of graduation or departure.

Student Access to Records

Students will have supervised access to all their records. Records are kept with the Registrar. Access to the student files is permitted to those who have a legal right and who demonstrate legitimate cause to the Registrar.

Transcripts

To obtain a transcript, please fill in a Transcript Request Form and submit it to the Registrar for processing. Transcripts will not be released for any student that has an outstanding obligation to the College. Outstanding obligations include, but are not limited to: tuition; overdue library books and fines; return, repair, or replacement of OAP equipment; airport shuttle fees; work study shortfalls and other fees. Due to privacy considerations, transcripts will not be faxed. Recording errors should be brought to the attention of the Registrar.

Transcripts from other institutions submitted to Wyoming Catholic College become the property of the College and will not be reproduced or mailed to other institutions, agencies or individuals as an official transcript. Students must request such transcripts from the institution from which those transcripts were originally issued.

Certifications of Enrollment

Certification or Verification of Enrollment for insurance, employment, scholarships or other purposes, may be obtained from the Registrar. The Registrar can also fill in and sign forms for good student discounts, loan deferments, etc.

DIRECTORY

FACULTY

Glenn Arbery, *Associate Professor of Humanities*
Ph.D. (Literature), University of Dallas

Virginia Arbery, *Associate Professor of Humanities*
Ph.D. (Political Philosophy), University of Dallas

PROFESSION OF FAITH AND OATH OF FIDELITY

Due to the Catholic commitment of Wyoming Catholic College, and in view of the principle that the faith and tradition of the Catholic Church are the crux of our curriculum, *all* faculty, upon their being hired, agree never to publicly reject or defy either the authentic teaching authority of the Catholic Church or the Pope's authority as head of the Catholic Church. Furthermore, at the beginning of the school year, all Catholic members of the faculty, as well as the President, the Dean of Students, and the chaplains voluntarily make a public Profession of Faith and take the Oath of Fidelity as set forth below, in the presence of the Bishop of Cheyenne or his representative.

In conformity with Pope John Paul II's Apostolic Letter *Ad Tuendam Fidem*, the following Profession and Oath are proposed by the Sacred Congregation for the Doctrine of the Faith (29 June 1998):

I. PROFESSION OF FAITH

"I, *N.*, with firm faith believe and profess everything that is contained in the Symbol of faith, namely:

"I believe in one God, the Father Almighty, maker of heaven and earth, of all things visible and invisible. I believe in one Lord Jesus Christ, the Only Begotten Son of God, born of the Father before all ages. God from God, Light from Light, true God from true God, begotten, not made, consubstantial with the Father; through him all things were made. For us men and for our salvation he came down from heaven, and by the Holy Spirit was incarnate of the Virgin Mary, and became man. For our sake he was crucified under Pontius Pilate, he suffered death and was buried, and rose again on the third day in accordance with the Scriptures. He ascended into heaven and is seated at the right hand of the Father. He will come again in glory to judge the living and the dead and his kingdom will have no end. I believe in the Holy Spirit, the Lord, the giver of life, who proceeds from the Father and the Son, who with the Father and the Son is adored and glorified, who has spoken through the prophets. I believe in one, holy, catholic, and apostolic Church. I confess one Baptism for the forgiveness of sins and I look forward to the resurrection of the dead and the life of the world to come. Amen.

"With firm faith, I also believe everything contained in the Word of God, whether written or handed down in Tradition, which the Church, either by a

solemn judgement or by the ordinary and universal Magisterium, sets forth to be believed as divinely revealed.

“I also firmly accept and hold each and every thing definitively proposed by the Church regarding teaching on faith and morals.

“Moreover, I adhere with religious submission of will and intellect to the teachings which either the Roman pontiff or the College of Bishops enunciate when they exercise their authentic Magisterium, even if they do not intend to proclaim these teachings by a definitive act.”

II. OATH OF FIDELITY

“I, *N.*, in assuming or continuing the office of teacher at Wyoming Catholic College, promise that in my words and in my actions I shall always preserve communion with the Catholic Church.

“With great care and fidelity I shall carry out the duties incumbent on me toward the Church both universal and particular, in which, according to the provisions of the law, I have been called to exercise my service.

“In fulfilling the charge entrusted to me in the name of the Church, I shall hold fast to the deposit of faith in its entirety; I shall faithfully hand it on and explain it, and I shall avoid any teachings contrary to it.

“I shall follow and foster the common discipline of the entire Church and I shall maintain the observance of all ecclesiastical laws, especially those contained in the Code of Canon Law.

“With Christian obedience I shall follow what the Bishops, as authentic doctors and teachers of the faith, declare, or what they, as those who govern the Church, establish.

“I shall also faithfully assist the diocesan Bishop, so that the apostolic activity, exercised in the name and by mandate of the Church, may be carried out in communion with the Church.

“So help me God, and God’s Holy Gospels on which I place my hand.”

MANDATUM FOR THEOLOGIAN

The Code of Canon Law (can. 812) requires that all Catholics who teach Catholic theological disciplines in a Catholic institution of higher studies have a mandate, or *mandatum*, from the local competent ecclesiastical authority, which in the case of Wyoming Catholic College is the Ordinary of the Diocese of Cheyenne. The

mandatum is fundamentally an acknowledgment by Church authority that a Catholic professor of theology is teaching in full communion with the Catholic Church, and it concerns both the content of what is taught as well as the professor's commitment and responsibility to teach authentic Catholic doctrine and to refrain from putting forth as Catholic teaching anything contrary to the Church's Magisterium. While the professor who receives the *mandatum* is not teaching *ex officio* in the name of the Bishop or of the Church's Magisterium, his teaching of Catholic theology is nevertheless considered to be a genuine part of the Church's mission.

All professors and teachers of theology at Wyoming Catholic College are required to seek and obtain a *mandatum* from the Bishop of Cheyenne prior to teaching students at the College, and must always retain this *mandatum* if they are to retain the right to teach the students.

A SUMMARY OF WYOMING CATHOLIC COLLEGE'S PHILOSOPHICAL VISION STATEMENT

OUR MISSION

Wyoming Catholic College is a four-year college committed to offering a liberal arts education that steepens its students in the awesome beauty of our created, natural world and imbues them with the best that has been thought and said in Western civilization, including the moral and intellectual heritage of the Catholic Church. The College strives to promote a love of learning, an understanding of natural order, and the quest for virtuous living so that its graduates will assume their responsibilities as citizens in a free society.

The curriculum and campus are devoted to the formation of the whole person, i.e., the spiritual, physical, and intellectual dimensions. Studies include the classics of imaginative literature, history, mathematics, science, philosophy, fine arts, and theology. They employ Great Books as well as the natural created world, effecting a rich combination of intellectual and experiential-poetic knowledge. Students' imaginations are enriched and their capacity for wonder deepened. Moreover, students and faculty share in a campus life that reflects the ideals taught directly and indirectly in the classroom.

In the Catholic tradition, emphasis is placed not on the dissemination of information, but rather on the development and perfection of the intellect, the passions, and the will, enabling students to approach and embrace the good, the true, and the beautiful throughout their lives.

In addressing the whole person the College contributes to the students' spiritual and moral formation. This is done via Catholic culture, context, and traditions. The College is staunchly faithful to the Magisterium of the Roman Catholic Church and the deposit of faith handed down over the past two thousand years.

THE PHILOSOPHICAL FOUNDATION OF WYOMING CATHOLIC COLLEGE

Catholic tradition holds that there are two means to acquire sure knowledge of the truth, by reason and by divine faith, the first leading to natural truth and the second to supernatural truth, which are the proper goals of liberal education. In respect to reason, Western education is traditionally based on the *philosophia*

perennis or perennial philosophy, which, Jacques Maritain claimed, “existed from the dawn of humanity in germ [and] has remained firm and progressive...while all other philosophies have been born and have died in turn.” John Paul II calls the perennial philosophy an “implicit philosophy...within the history of thought as a whole, based upon man’s common experience of reality and his common-sense judgments about that reality.”

According to the perennial philosophy, a reality external to the mind exists, the mind can know this reality, and a person can communicate that knowledge. Certain principles (those, for example, of non-contradiction, finality, and causality) belong to this philosophy, and although these principles have occasionally been attacked throughout the ages, the attacks have had no lasting success. Wyoming Catholic College thus recognizes the perennial philosophy as the bedrock of reason and education.

The College is firm likewise in its conviction that God has revealed certain truths that reason is incapable of knowing except through divine faith. These truths are contained in the deposit of faith that has come down to us through Scripture and Tradition, authentically interpreted, taught, and guarded by the Magisterium of the Holy Catholic Church.

THE NATURE OF LIBERAL EDUCATION

The nature of a liberal education rests on a definition of education in general. The word is from the Latin *ex-ducere*, which means “to draw out” or “to educe”—in our case, that which is potentially but not yet actually in the student. Tradition has defined education as “the cooperative art of making men better.” A philosophy of education must therefore address the question of what “a better man” is. In essence, he is one who perfects his innate potentialities and powers through good physical, moral, and intellectual habits or virtues. Virtues are acquired throughout one’s lifetime, through both formal and informal education; and formal education may be liberal or illiberal, the traditional distinction being that liberal education aims at making men better *as men* by perfecting their similar natures, while illiberal education aims at making men better *as workers* by perfecting their different, individual talents. Liberal education produces good men; illiberal education produces good workers. Thus liberal education, being general rather than specialized, is said to be everybody’s rather than somebody’s business.

John Stuart Mill argued that the undergraduate college should provide a liberal education only. “Universities,” he said, “are not to make skillful lawyers, or physicians, or engineers, but capable and cultivated human beings.” Further, “Men are men before they are lawyers, or physicians, or merchants...and if you make them capable and sensible men, they will make themselves capable and sensible lawyers or physicians.”

THE IMMEDIATE PURPOSE OF LIBERAL EDUCATION

In philosophy, one speaks of immediate, proximate, and final purposes. We will address each of these. First, in relation to education, the immediate purpose is the development of physical, moral, and intellectual virtues, which are good habits. Physical virtue is said of a sound and graceful body and of well-formed powers of sense, both internal and external; moral virtue pertains to an ordered and harmonious soul, and intellectual virtue to the disciplined mind.

Physical virtue is acquired through the poetic modes of gymnastics and music. The poetic mode of education begins in the home, as children listen to stories read out loud to them, as they play, and as they sing. They develop their external senses as well as their internal ones (imagination, memory, etc.). As the educator Michael Platt pointed out: “Learning is first in the senses and in the imagination before it is in the intellect.”

Gymnastics embraces athletic arts or skills but includes as well some more refined activities such as stargazing, horseback riding, and dancing; and music includes not only tune or the melding of tunes and words, but also the fine arts such as sculpture, architecture, pictorial art, and imaginative literature.

Students at Wyoming Catholic College will not lose touch with physical virtue. The location of the College keeps the student close to the reality of nature, and its curriculum and culture further his experience with music and fine arts, guiding him towards loving reality, mystery, and eventually wisdom.

A liberal education cultivates first the physical and then moral virtue, also essential to a well-educated, “better” man. As far back as Plato, tradition teaches that a moral, harmonious soul is characterized by the cardinal virtues of prudence, temperance, fortitude, and justice. If we were solitary creatures, prudence, temperance, and fortitude would suffice, but because we are social animals, members of families, cities, and states, we need the virtue of justice, which looks to the good of others, to the common good of the state, and ultimately to the individual’s own good.

Because our college is Catholic, it is interested also in promoting the practice of the theological virtues of faith, hope, and charity. Unlike the natural moral virtues acquired by repetitive doing, the theological virtues are freely given by grace. Nonetheless, a college can help students be more apt to receive such grace and to act upon it.

The moral virtues are developed by practice and encouraged through education in three ways: by example, by poetic moral education, and by campus culture. The most efficacious way to make students want to practice virtue is by example. Wyoming Catholic College therefore seeks to employ persons of good moral character—teachers, priests, administrators, and workers.

In addition to example, a poetic education inspires students morally. They read tales of heroes and discuss heroic, virtuous characters in poetry. Through a poetic moral education, the students become better apt and able to consider, judge, and understand moral precepts.

Lastly, a good cultural environment is conducive to moral development. Wyoming Catholic College establishes and cultivates a proper campus culture through the liturgy, sacraments, and music of the Roman Catholic Church integrated into the life of the College.

The intellect is the highest power of man because it is spiritual. It knows being in an immaterial way; it influences and orders all of man's lower powers; and it accounts for his special dignity as a species made in the image and likeness of God. The intellectual virtues are habits of knowledge that better the mind either by helping it acquire knowledge as an end in itself or by helping it acquire knowledge for the sake of practice. The first is speculative knowledge, which betters the mind by understanding, science, and wisdom, while the second is practical knowledge, which betters the mind through prudence and art.

The liberal arts are of special concern at Wyoming Catholic College because they are the arts of learning itself. They govern the operations of thinking, reading, writing, speaking, observing, and calculating. The liberal arts are traditionally divided into the trivium and quadrivium. The trivium consists of grammar, logic, and rhetoric, which discipline the mind as it finds expression in language. The quadrivium includes geometry, arithmetic, astronomy, and music. These four arts constitute the mathematical disciplines, as is obvious in respect to arithmetic and geometry but true also of astronomy and music, which may be considered from a purely quantitative point of view.

All intellectual disciplines of study may be approached from the point of view of general or liberal studies rather than just specialized or vocational studies. As Mortimer Adler has said:

Even the literature of the sciences and of mathematics can be read and understood in a way that brings them within the grasp of the generalist who, in the light of his common sense and his common experience, asks philosophical questions about them and uses the liberal arts to pursue the answers.

THE PROXIMATE PURPOSE OF LIBERAL EDUCATION

While the immediate purpose of liberal education focuses on perfecting the individual in himself, the proximate purpose goes beyond the individual to consider his relation to a community and its tradition: a liberal education initiates us and educates us into a culture. Thus, acculturation is the second, proximate

purpose of liberal education. Our greatest English poet says a person plays many parts in his lifetime—mother and father, teacher and student, vocationalist and avocationalist—but he always carries his humanity with him. He is always the *human* father, the *human* teacher, the *human* vocationalist. Wyoming Catholic College thus deals with the perennial questions that address God, man, and nature, such as what it means to be a civilized man or a barbarian, the purpose of work and leisure, the nature of democracy and tyranny, the value of wealth and luxury, the battle of man and nature, and the relation of man to God. To ignore these questions is to forget that, prior to being a parent or a worker, one is fundamentally a human person with all the questions the human condition gives rise to, all the fertile insights our culture has transmitted to us, and all the wisdom our holy faith brings to us.

THE FINAL PURPOSE OF LIBERAL EDUCATION

The third or final purpose of a liberal arts education is man's final goal: happiness. The highest good we seek is natural happiness in this life and the supernatural happiness of the life to come. A Catholic liberal education produces a free man who, because he possesses the intellectual, moral, and theological virtues, can direct himself—with God's grace—to his proper end.

THE CREST OF WYOMING CATHOLIC COLLEGE

The crest captures the mission of the College. The Eagle with its breast shield represents far-sighted wisdom. The Lion is the symbol of Christ the King. The Book and Sword stand for learning and truth. The Mountain, Sun, and Wheat signify the created world, which also instructs the students. The Moon is the symbol of the Blessed Virgin Mary, Seat of Wisdom, above the Wall and Anchor of the Church and her faith. The true (*verum*), the good (*bonum*), and the beautiful (*pulchrum*) are the transcendental goals of all of the College's educational endeavors.

NOTICE OF NON-DISCRIMINATION

Wyoming Catholic College admits students of any race, color, national and ethnic origin to all the rights, privileges, programs, and activities generally accorded to or made available to students at the school. It does not discriminate on the basis of race, color, national and ethnic origin in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs.

DISCLAIMER

Wyoming Catholic College issues this *Catalog* to furnish prospective students and other interested people with information about the College. Readers should be aware that courses listed in this *Catalog* and the reading lists appointed for them are subject to change without notice and may not be regarded as a binding obligation on the College. Changes in circumstances may necessitate alterations in College policy, procedures, curriculum, tuition or fees.
